## **Acknowledgements**

The research team would like to thank the leadership and membership of the participating communities for welcoming us into their communities and for their practical assistance and insightful contributions to the project.

This project was made possible by funding through grants from the following organizations:

## Canadian Institutes of Health Research (CIHR)

Canada's major federal funding agency for health research. This project was funded by two
of the institutes:

## Institute of Aboriginal People's Health (IAPH)

> supports research to address the special health needs of Canada's Aboriginal people

## Institute of Population and Public Health (IPPH)

supports research into the complex interactions (biological, social, cultural, environmental) which determine the health of individuals, communities, and global populations

### Saskatchewan Health Research Foundation (SHRF)

- provincial government-funded agency responsible for funding health research in Saskatchewan
- encourages and facilitates research in the health sciences, health-related social sciences, and other health-related fields
- provides funding to individuals and agencies working on research projects that are consistent with a provincial health research strategy

## Northern Medical Services (NMS), University of Saskatchewan

- one of three divisions of the Dept. of Family Medicine, College of Medicine, University of Saskatchewan
- works with district Health boards and Tribal Councils in the north to liaise with other health care personnel, local community committees and other agencies who provide services to the community

## Researchers

## **Principal Research Team**

Bonnie Jeffery, Ph.D., Faculty of Social Work and Saskatchewan Population Health and Evaluation Research Unit, University of Regina Principal Investigator

Sylvia Abonyi, Ph.D., Department of Community Health and Epidemiology and Saskatchewan Population Health and Evaluation Research Unit, University of Saskatchewan Co-principal Investigator

Colleen Hamilton, Saskatchewan Population Health & Evaluation Research Unit Project Coordinator

## Saskatchewan First Nation Partners

This multidisciplinary and collaborative project was undertaken in partnership with three First Nations health organizations: Prince Albert Grand Council (PAGC), the Athabasca Health Authority (AHA) and the Northern Inter-Tribal Health Authority (NITHA). The PAGC, AHA and NITHA managers were members of the research team.

## Introduction

In the process of conducting the 2002 evaluation of transferred health services from First Nations and Inuit Health Branch (FNIHB) to the Prince Albert Grand Council (PAGC) in Saskatchewan, PAGC health managers expressed a desire to address questions beyond the scope and capacity of the evaluation that they felt were relevant to the ongoing development of health services in their member communities. They were especially interested in the issue of the health effects of other human services on community health and wellness. PAGC health managers were also interested in determining what information communities could collect to track and monitor their progress in the area of community health outcomes.

The First Nation's Health Development: Tools for Program Planning and Evaluation project was built upon the 2002 evaluation to consider these issues. The primary objectives of this research project were 1) to develop an evaluation framework and 2) to develop indicators for use by First Nations health organizations to track the effects of health and human service programs under their jurisdiction. The outcome of this research project is the Community Health Indicators Toolkit.

The Community Health Indicators Toolkit is, in essence, the evaluative framework manual. It was designed to assist with the identification and collection of data, based on the framework domains and indicator categories, that would help measure progress on improving community health.

This section will help you navigate through the toolkit

as you review the Community Health and Wellness Evaluative Framework and indicators that have been developed as part of this research project. Many indicators will be relevant to your community. However, this framework can also act as a guide to help you develop other indicators that reflect the uniqueness of your own community.

What is a Framework?

A framework is simple model of complex things. Much like a house plan starts with a simple outline of its walls and rooms, the finished house with furnishings is much more complicated. A framework for community health indicators is similar. It is a simple model of complex social, cultural, economic and environmental relationships and behaviours that effect the wellness of a community.

This Community Health Indicators
Framework organizes the concepts of
community health described by
community members into key areas
(domains) with proposed
measurements (indicators). These
indicators can then be tracked over
time to see if there have been
changes, allowing for evaluation of
progress. When used in this way the
indicators framework becomes an
Evaluative Framework.

## Structure of the Toolkit:

The toolkit consists of:

- 1. a diagram of the Evaluation Framework
- a section on each of the domains of community health and wellness with their associated indicators
- 3. A **Methods** section, which provides detailed information on the research process.

Further descriptions of the Evaluative Framework and the domain sections appear below:33

#### What is an Indicator?

An indicator is a measure of something. It is usually a number, but not always. Letter grades in school are an indicator but not a number.

For example, playing sports was one of the activities identified as contributing to a healthy lifestyle. People playing sports could therefore be an indicator of a healthy lifestyle.

## 1. The Evaluation Framework Diagram identifies:

- the key factors (domains) which impact the health and wellness of a community
- the specific areas within each domain (indicator categories) identified as playing a role in community health and wellness
- the important individual health and addiction issues affecting the health and wellness of the community

Indicator Categories

Figure 1 – Evaluation Framework Diagram

- 2. The individual domain sections of the manual include:
  - a) a description of the domain and a list of the indicator categories (see Figure 2)
  - a numbered list of community proposed indicators within the domain, grouped by indicator category and issue areas (see Figure 2)
  - a set of **Data Sheets**, which organizes the indicators within each category into an indicator table (see Figures 3 & 4)

#### What is a Domain?

A domain is a major category that has been identified as being an important area that affects health. A domain identifies key issues that need to be measured by specific indicators.

For example, Healthy Lifestyles was identified as a key area that affects both individual and community health and is therefore a domain of community health and wellness.

- d) a list of **data source references** that identify the source of the specific question, measure, or existing data that is listed in the indicator table (see Figure 5)
- e) a **Tool Sheet**, which provides an example of a how one might collect data and calculate a value for a specific indicator *(see Figure 6)*

## How to Use the Toolkit

As you look at the framework diagram, you may be interested in finding out more about one area that affects the health and wellness of a community. For example, people spoke about how participating in social and physical activities is part of a healthy lifestyle. The toolkit identifies ways in which communities proposed that participation levels in social and physical activities could be measured.

The **participation** indicator category of the Healthy Lifestyle domain contains a number of community-proposed indicators that statistical information can be collected on to measure participation, as it relates to a healthy lifestyle. You may want to find out if any of these indicators would be useful measures in your community. The steps outlined in the following pages show how you would use the toolkit to do this.

### **How are Indicators Used?**

Collecting information on indicators can provide data to enable decision-making, set priorities, or evaluate the progress of a plan or program.

For example, measuring the level of participation in sports activities can help determine whether a desired participation level is being met, or if a specific program is having the desired effect. Measuring activity levels of different groups, like Elders or youth, can help identify whether these groups are being served by existing programs.

- Go to the Healthy Lifestyles section of the toolkit, which is identified by a tab in the binder.
- As you flip to the Healthy Lifestyle section, you will see that the first page provides a
  description of the Healthy Lifestyle domain, and lists numbered indicators under each
  indicator category (see Figure 2).
- Looking at the Participation category, you will see the list of indicators (numbered 9 –
   15) that relate to Participation.
- You will note that these indicators have been further grouped under "Social Activities" and "Elders and Youth". These are areas in which issues have been identified that relate to specific participation indicators.

**Healthy Lifestyles** Healthy lifestyles relate to positive personal life choices that include proper diet and physical activity and that build respectful healthy relationships with family and community. **Domain Description** — It involves making life choices that contribute to and foster the development of positive selfesteem within the individual. Indicators: Indicator Category — Self Care 4 - appointments kept vs missed 9 - participation in community events **Motivation** 10 - organizing/volunteering at events 5 - comfort disclosing health issues 16 – activities available Healthy Home Physical Activities Issue Area —

Hygiene

**Participation** 

Social Activities

8 - practicing good personal hygiene

7 - limiting TV/video game use 12 - weight and fitness training

13 - playing sports

Eders & Youth

15 - Elder/youth activities

Figure 2 – Domain Description & Indicator List

ng indicators proposed

2 – taking medications as prescribed

Proposed Indicators -

18 - program participation and retention

20 - direct contacts to provide information

... continued on next page

19 - age range of participants

Environmental Concerns

21 - walking groups

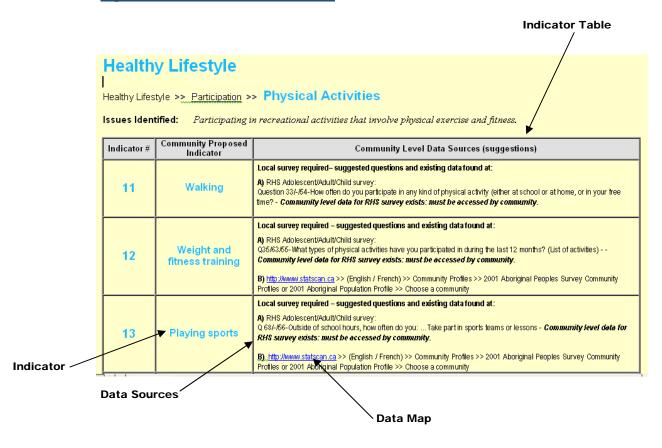

- Go to the Healthy Lifestyles Data Sheets, which follow the indicator lists of the Healthy Lifestyle section.
- Flip through the Data Sheets to the beginning of the Participation indicator category, identified in the title line: Health Lifestyles >> Participation (see Figure 3).
- The Participation indicator category is further broken down under issue areas:
   Social Activities (indicators 9 &10); Physical Activities (indicators 11-14); and Elders and Youth (indicator 15).
- A description of the **issues identified** is provided below the title line, in italics.

Title Line **Healthy Lifestyle** Healthy Lifestyle >> Participation >> Social Activities Domain Healthy Lifestyle nd involved in the community through cultural, spiritual, social, recreational and sporting events. Community Proposed Indicator **Indicator Category** Indicator # Community Level Data Sources (suggestions) Participation Attendar Local survey required **Issue Area** Social Activities Local survey required - suggested questions: Organizing or A) CBM: Community-Based Monitoring Project Question 28/21 - How many times have you volunteered for a community event (e.g. feast/helping Elder) in the last year? volunteering at 10 community events Issues Identified Data Sources: A) CBM: Community-Based Monitoring Project (Adult survey: page 23 in document; page 26 in PDF) – Question 28 Find source at: http://www.wkss.nt.ca/HTML/08\_ProjectsReports/PDF/CBMFinal2002.pdf A) CBM: Community-Based Monitoring Project (Youth survey: page 34; page 37 in PDF) – Question 28 Find source at: http://www.wkss.nt.ca/HTML/08\_ProjectsReports/PDF/CBMFinal2002.pdf

Figure 3 - Data Sheet Identification

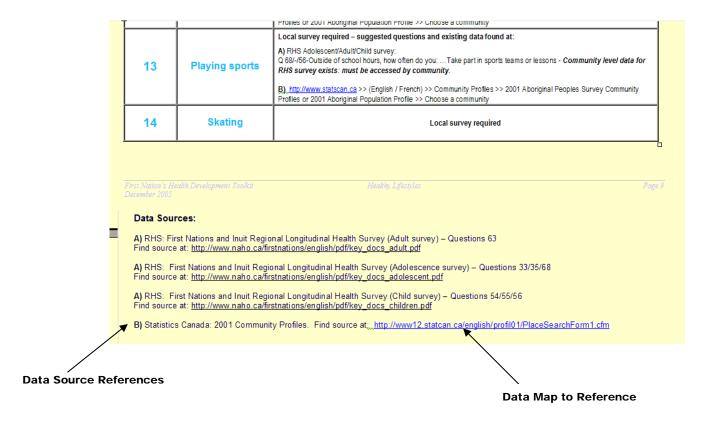

- The Participation indicators are contained in an indicator table, which appears just below the description of the issues identified (see Figure 4).
- The indicator tables contain existing statistical data on northern Saskatchewan communities and suggested questions or measures that could be used to perform a community based survey.
- A data map of existing data directs you on how to find it online. Follow each step of the data map to find the relevant information, or the closest possible site where you can contact someone to gather that data.

Figure 4 - Data Sheet Indicator Table

- Listed at the end of each group of indicator tables, are the data source references, where the information was gathered (see Figure 5). This is a direct reference to the source of the specific question, measure, or existing data that is listed in the indicator table. Keep in mind that online sources often change and you may have to visit the original site and find the specific document yourself.
- Each information source in the indicator tables is assigned a letter such as A), B),
   C), etc. The letter in the indicator table and the letter in the data sources are matched, so you can find the specific data source for each piece of information in the indicator table.

Figure 5 - Data Source References

- Finally, at the end of each domain section a **Tool Sheet** has been created to provide an example of how one might collect and interpret data to measure a specific indicator (see Figure 6).
- The Tool Sheet contained in the Healthy Lifestyle domain uses indicator #13 Playing Sports as an example.

### Figure 6 - Tool Sheet

An excerpt from the Healthy Lifestyle Tool Sheet **Healthy Lifestyle** Healthy Lifestyle >> Participation >> Physical Activities Issues Identified: Participating in recreational activities that involve physical exercise and fitness. Proposed Indicator: #13 - Playing Sports Suggested Measure: Compare the desired participation rates in recreational activities with current participation rates. Information Source: Existing data and suggested questions that could be used in a local survey are provided below. These are focused on children (8-14). Limitations to the existing data are noted below (see \*). A) RHS Adolescent/Adult/Child survey\_http://www.naho.ca/firstnations/english/pdf/key\_docs\_adolescent.pdf Question 68 - Outside of school hours, how often do you: ... Take part in sports teams or lessons? Note: Community level data for RN Saurvey exists; must be accessed by community. B) http://www.statscan.ca/>> (English / French) >> Community Profiles >> 2001 Aboriginal Peoples Survey Community Profiles >> Choose: Child / Saskatchewan / Choosea Community Howloften child plays sports per week: Never or less than once (%) One or more times (%) C) For specific recreation information that includes past and upcoming events in the Athakasca region go to ; http://www.nrcc.sk.ca/ How to use this measure. Identify the desired rate of participation in sports activities for the age group (example: 6-14; Step 2) Determine the current rate of participation for the age group, by using existing data (as in the

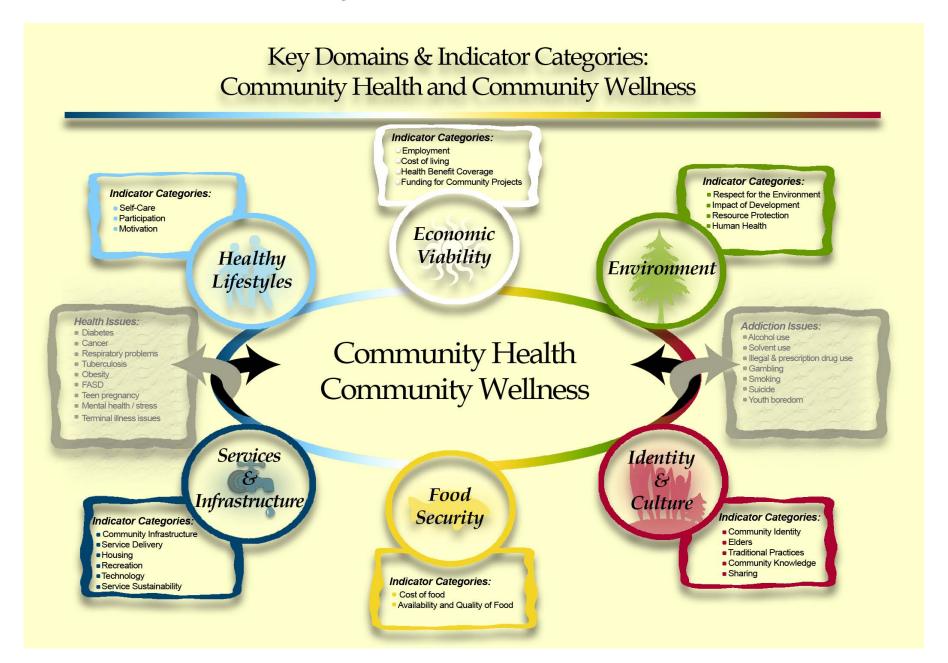

## Notes About a Few of the Surveys and Existing Data

Any information (questions) that is listed as RHS (Regional Health Survey) has already been gathered for some communities and can only be accessed by that community. General survey questions are offered as examples for community developed surveys.

The Statistics Canada information is also readily available and easily found on their website. The data link will connect to the most up to date information that can be found. The direct data map to the questionnaires for this information is included here:

Find source at: <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English/French) >> Definitions, Data Sources and Methods >> under the heading Questionnaires; Alphabetical list >> English or French Questionnaire of Aboriginal Peoples Survey – 2001

## **Community Health Indicators Framework**

A state of community self-sufficiency, where there are businesses and economic partnerships to promote a local economy; jobs available to sustain personal and family needs; food, housing and medical services that are affordable; and a sense of optimism when community members consider future developments.

## **Indicators:**

**Local Business** 

6 – local businesses

7 – employment in local business

<u>Employment</u>	Cost of Living		Health Benefit Coverage
Local Availability	Cost of Food	Cost of Housing	Prescription Drugs
1 – unemployment rate	no indicators proposed	13 – % of income spent on housing	20 – drug costs paid out-of-pocket
2 – jobs in the community	Cost of Healthy Food	14 – housing waitlists	21 – unfilled prescriptions
3 – people working outside community	no indicators proposed	15 – low income housing availability	Medical Transportation
Strategic Training	Food Subsidies	Utility Costs	22 – medical transportation coverage
4 – training for potential jobs	8 – food programs & usage	16 – cost of utility hook-up/reconnects	23 – treatment not followed due to cost
Disincentives to Work	9 – incentive to carry healthy foods	Competitive Retailing	Companion & Translation Services
Indicator #1	Transportation Costs	17 – level of retail competition	24 - Elders & youth travelling alone
5 – cost of working vs social assistance	10 – cost of fuel	Social Assistance Rates	

11 – distance to services

12 – cost of airline travel

... continued on next page

18 – costs met by social assistance

**Single Parent Families** 

19 – single parent families

## **Funding for Community Programs**

## **Sufficient Funding**

no indicators proposed

## **Stable Funding**

no indicators proposed

## Infrastructure

no indicators proposed

## Staffing

- 25 vacant staff positions
- 26 staff training levels
- 27 length of time in position
- 28 community satisfaction with staff

#### **Promotion**

- 29 program participation rates
- 30 program awareness levels

Economic Viability >> Employment >> Local Availability

**Issues Identified:** 

Having few jobs available in the community requires people to leave in order to obtain work, which impacts family members left behind, community morale and volunteerism. Local jobs contribute to community sustainability.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)

## Glossary of Unemployment Terms used by Statistics Canada

## **Participation Rate**

Refers to the labour force in the week (Sunday to Saturday) prior to Census Day (May 15, 2001), expressed as a percentage of the population 15 years of age and over.

## **Employment Rate**

Refers to the number of persons employed in the week (Sunday to Saturday) prior to Census Day (May 15, 2001), expressed as *a percentage of the total population* 15 years of age and over.

Note: The "% of adults not working for pay or in self-employment" is expressed as a percentage of the total population.

## **Unemployment Rate**

Refers to the unemployed expressed as *a percentage of the labour force* in the week (Sunday to Saturday) prior to Census Day (May 15, 2001).

## When last worked for pay or in self-employment

Refers to the year or period in which persons last worked for pay or in self-employment (even if only for a few days). It includes those who worked without pay in a family farm, business or professional practice. It does not include unpaid housework, unpaid childcare, unpaid care to seniors or volunteer work. It is used to identify persons with recent paid work experience.

## **Unemployed** (in reference week)

Persons who, during the week (Sunday to Saturday) prior to census day (May 15, 2001) were without paid work or without self-employment work and were available for work and either:

- Had actively looked for paid work in the past four weeks, or
- Were on temporary lay-off and expected to return to their job, or
- Had definite arrangements to start a new job in four weeks or less.

The unemployed category consists primarily of those persons who, during the week prior to enumeration (count; to ascertain a number), were without paid work, were unavailable for work, and had actively looked for paid work in the past four weeks.

Economic Viability >> Employment >> Strategic Training

Issues Identified:

When industry is developed in the region, local people are often not qualified for the available jobs. A need exists for targeted training in advance of industry start-up so that when industry is set up and jobs are available, local people are trained and qualified.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)

Economic Viability >> Cost of Living >> Cost of Housing

**Issues Identified:** 

An overall scarcity of housing units contributes to higher rents and a further lack of low-income housing units contributes to overcrowding as those with low incomes move in with other family members. Frequent moves in search of better housing increases costs (i.e. re-hookup of utilities).

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
13	% of income spent on housing	Local survey required
14	Housing waiting lists	Local survey required
15	# of low income housing units	Local survey required

## **Data Sources:**

Economic Viability >> Cost of Living >> Utility Costs

**Issues Identified:** 

Utility costs can vary depending on whether a person is on social assistance or not. The cost of utilities is impacted by the cost of utility re-hook-ups.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
16	Dollar amount of utility hook-ups and reconnects	Local survey required

## **Data Sources:**

Economic Viability >> Cost of Living >> Competitive Retailing

**Issues Identified:** Food and fuel costs were reduced in communities where there was competition between retailers.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
17	# of retailers per commodity (i.e. fresh food, gas)	Local survey required

## **Data Sources:**

Economic Viability >> Cost of Living >> Social Assistance Rates

**Issues Identified:** Social assistance rates do not adequately provide for the cost of living in northern Saskatchewan.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
18	% of cost of living met by social assistance rates	Local survey required

## **Data Sources:**

Economic Viability >> Cost of Living >> Single Parent Families

**Issues Identified:** Many families are headed by single parents who experience reduced economic power (loss of spousal

economies of scale) and increased costs (child care and other supports.)

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
19	# of single parent families	Existing data found at: <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community

## **Data Sources:**

A) Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

Economic Viability >> Health Benefit Coverage >> Prescription Drugs

Issues Identified:

The cost of prescription drugs is not always covered, depending on factors such as status and whether an individual is on social assistance. A recent policy requiring Treaty people to sign a confidentiality waiver or pay for health benefits up front has impacted whether people fill their prescriptions or not.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
20	% of drug costs paid "out of pocket" vs. by health programs	Local survey required
21	# of prescriptions issued to a patient but not filled	Local survey required – suggested questions:  A) RHS (Adult survey):  - During the past 12 months, have you experienced any of the following barriers to receiving healthcare? (List includes: Not covered by Non-Insured Health benefits [e.g. service, medication, equipment]; Prior approval for services under Non-Insure Health Benefits was denied; Could not afford direct cost of care/service; Could not afford direct costs; Could not afford childcare costs) Community level data for RHS survey exists: must be accessed by community.

### **Data Sources:**

A) RHS: First Nations and Inuit Regional Longitudinal Health Survey (Adult survey) - Question 54. Find Source at: <a href="http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_adult\_questionnaire.pdf">http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_adult\_questionnaire.pdf</a> (no longer available online)

Economic Viability >> Health Benefit Coverage >> Medical Transportation

### Issues Identified:

Coverage of costs for travel away from the community for medical treatment often do not cover the actual costs. e.g., accommodation is not always provided after hospital discharge; travel coverage is to the closest major centre from the community, not the city where the doctor or specialist is located. The abuse of medical transportation coverage results in a rigid application of benefits.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
22	% of actual costs covered by medical transportation funding	Local survey required – suggested questions:  A) RHS (Adult survey):  - During the past 12 months, have you experienced any of the following barriers to receiving healthcare?  (List includes: Not covered by Non-Insured Health benefits [e.g. service, medication, equipment]; Prior approval for services under Non-Insure Health Benefits was denied; Could not afford direct cost of care/service; Could not afford direct costs; Could not afford childcare costs) Community level data for RHS survey exists: must be accessed by community.
23	# of patients who do not follow recommended treatment due to cost	Local survey required – suggested questions:  A) RHS (Adult survey):  - During the past 12 months, have you experienced any of the following barriers to receiving healthcare?  (List includes: Not covered by Non-Insured Health benefits [e.g. service, medication, equipment]; Prior approval for services under Non-Insure Health Benefits was denied; Could not afford direct cost of care/service; Could not afford direct costs; Could not afford childcare costs) Community level data for RHS survey exists: must be accessed by community.

#### **Data Sources:**

A) RHS: First Nations and Inuit Regional Longitudinal Health Survey (Adult survey) - Question 54
Find Source: <a href="http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_adult\_questionnaire.pdf">http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_adult\_questionnaire.pdf</a> (no longer available online)

Economic Viability >> Health Benefit Coverage >> Companion & Translation Services for Elders and Youth

Issues Identified:

Transportation costs are usually provided only for the person seeking treatment and as a result, very ill Elders and youth often have to travel alone. Elders do not have someone who can translate for them, especially needed to understand complex medical terminology.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
24	# of Elders & youth (under 16) travelling alone for medical care	Local survey required

### **Data Sources:**

Economic Viability >> Funding for Community Programs >> Sufficient Funding

**Issues Identified:** Programs are chronically under-funded in some or all areas of operation. In order to be effective and produce desired outcomes, programs require sufficient funding (budget) to carry out identified activities.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	None proposed	Local survey required

### **Data Sources:**

Economic Viability >> Funding for Community Programs >> Stable Funding

**Issues Identified:** Programs require stable, long-term funding to allow for planning and evaluation, and to develop community commitment and support.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	None proposed	Local survey required

### **Data Sources:**

Economic Viability >> Funding for Community Programs >> Infrastructure

**Issues Identified:** *Programs require suitable infrastructure to carry out identified activities (buildings, equipment, supplies).* 

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	None proposed	Local survey required

## **Data Sources:**

Economic Viability >> Funding for Community Programs >> Staffing

**Issues Identified:** Programs often do not have sufficient funds to attract and hire trained staff; short-term funding can result in a lack of staff commitment.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)	
25	% of required positions vacant	Local survey required	
26	% of staff with formal training	Existing data found at:  A) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community	
27	Trained staff - length of time in position	Local survey required	
28	Community satisfaction with staff	Local survey required	

Data Sources:	
A) Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/9594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/9594/index.cfm?Lang=E</a>	<u> 32-</u>

Economic Viability >> Funding for Community Programs >> Promotion

**Issues Identified:** In order for community members to support and participate in programs, an awareness and connectedness must be developed.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
29	Program participation rates	Local survey required
30	Program awareness levels	Local survey required

### **Data Sources:**

# **Tool Sheet – Economic Viability**

## Economic Viability >> Employment >> Strategic Training

**Issues Identified:** When industry is developed in the region, local people are often not qualified

for the available jobs. A need exists for targeted training in advance of industry start-up so that when industry is set up and jobs are available, local people are

trained and qualified.

**Proposed Indicator:** # 4 – of training programs directly related to job opportunities

Suggested Measure: Compare the number of specific industry job opportunities available to the

number of local training spaces available related to the positions.

**Information Source:** Local survey

#### How to use this measure:

Step 1) Identify the specific job opportunity that will be available in the community or region.

Step 2) Identify training programs that directly relate to the type of job opportunity identified.

Step 3) Identify the # (number) of spaces available in those training programs.

Step 4) Use the 'Indicator Calculation Tool' formula to calculate the measure.

Indicator Calculation Tool	Calculation Example
( ) training program <b>X</b> ( ) spaces ( ) specific positions	(1) driller training program <b>X</b> (5) spaces (10) drilling positions available
( ) ( ) <b>X</b> 100 = % participating	$\frac{5}{10}$ = .50 <b>X</b> 100 = 50%
X = multiplied by ( ) = Insert number here	= divided by

## What does this information mean?

Of the 10 drilling positions available, only 50% of the necessary training seats are available to provide local training to community members who would then be qualified for the positions. This information could be used to support requests to colleges to deliver training programs, and to funding agencies to provide financial support for these training spaces.

Based on a respect for and commitment to the environment, this domain refers to the knowledge and resources necessary to manage the impact of development, both within and outside the community, and to ensure the environment is protected for future generations.

## **Indicators:**

Respect for the Environment	Impact of Development	Jurisdiction	Expertise
Valuing Natural Resources	Pollution	no indicators proposed	10 – funding from SERM
no indicators proposed	2 – air quality		11 – EHO to interpret reports
Commitment	3 – water quality	Resource Protection	
1 – community clean-ups	4 – levels of pollutants	Monitoring	<u>Human Health</u>
	<b>Environmental Clean Up</b>	7 – monitoring programs in place	Environmental
	5 - clean up agreements in place	Enforcement	12 – # forest fires near community
	Community Sustainability	8 – conservation officers per sq. kms.	13 – health effects of fire smoke
	6 – decrease in fish/wildlife populations	Jurisdiction	Structural
	Indicators #2, #3	9 – funds available for EHO monitoring	14 – accidents in home

Environment >> Respect for the Environment >> Valuing Natural Resources

**Issues Identified:** An appreciation for the beauty and resources that the land, water, fish and animals provide to current and

future generations.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	None proposed	Local survey required

## **Data Sources:**

Environment >> Respect for the Environment >> Commitment

**Issues Identified:** *Communities have a commitment to respect and protect the environment.* 

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
1	Community clean-ups	Local survey required

## **Data Sources:**

Environment >> Impact of Development >> Pollution

**Industry** (mines), population increase (residents and tourists) and lack of proper waste management systems at the community level are sources of land, air and water pollution.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)	
2	Air quality	Existing data found at:  A) <a href="http://www.cri.ca">http://www.cri.ca</a> >> Our communities >> Scroll down: Choose your community (if available - Black Lake, Camsell Portage, Fond du Lac, Stony Rapids, Uranium City, Wollaston Lake)  B) State of the Watershed Report 2007. Environment >> Human Health >> Structural

**Issues Identified:** Effects of housing (and other structural) quality on human health, including accidents due to houses in disrepair and health hazards such as black mold.

Community Proposed Community Level Data Sources (suggestions)

Indicator # Community Proposed Indicator | Community Level Data Sources (suggestions)

# of accidents in the home | Local survey required

### **Data Sources:**

## **Tool Sheet – Environment**

## Environment >> Resource Protection >> Enforcement

**Issues Identified:** An adequate number of conservation officers is needed to enforce

environmental regulations in the region, especially with the increase in

hunting and fishing camps.

**Proposed Indicator:** #8 – number of conservation officers per square kilometers

Suggested Measure: Compare the number of conservation officers assigned within a specified

geographic range to the number required.

**Information Source:** 1) SERM (Saskatchewan Environment and Resource Management)

<u>http://www.environment.gov.sk.ca</u> >> Corporate >> Contacts and Office Locations >>

Select Prince Albert for northern contacts

2) Local survey

#### How to use this measure:

**Step 1)** Identify the # (number) of conservation officers required or desired within a specific geographic range (in kms).

**Step 2)** Identify the # of conservation officers (identified from the information source above) assigned to the specific geographic range

**Step 3)** Use the 'Indicator Calculation Tool' formula to calculate the measure.

Indicator Calculation Tool	Calculation Example
( ) conservation officers assigned to area     ( ) conservation officers required in area	( 2 ) conservation officers assigned to area  ( 6 ) conservation officers required in area
( ) ( ) <b>X</b> 100 = % of needed officers	= .333 <b>X</b> 100 = 33% of needed officers
X = multiplied by ( ) = Insert number here	= divided by

#### What does this information mean?

Only one-third of the required conservation officers are available for the specified geographic area to properly enforce environment regulations. This information could be used to support a request for additional conservation officers.

An ability to convey community history, cultural and traditional practices and language, along with the nurturing of a holistic approach to life and intergenerational relationships. Activities that promote community culture and identity are acknowledged as key to developing positive self-esteem and positive self-image for community members.

## Indicators:

#### **Cultural Activities**

- 1 cultural activities & participation
- 2 volunteering at cultural events

### **Spiritual Activities**

- 3 spiritual activities & participation
- 4 visits by spiritual leaders

#### **Community Events**

- 5 community events & participation
- 6 transparency in use of event funds

#### **Community Morale**

- 7 feeling safe in the community
- 8 condition of buildings & grounds

- 9 recognition of positive contributions
- 10 distance from other communities

#### Communication

11 – community newsletter

#### **Elders**

#### **Involvement with Youth**

- 12 formal Elder / youth activities
- 13 informal Elder / youth activities

#### **Involvement in Community**

- 14 social gathering places for Elders
- 15 community decision with Elder input

#### **Remain in Community**

- 16 Elders leaving for end of life care
- 17 support programs for Elders

#### **Traditional Practices**

#### **Spiritual**

18 – visits to community by Medicine Man

#### Cultural

19 - traditional cultural activities

#### Language

- 20 youth speaking traditional language
- 21 teachers speak traditional language
- 22 language used in assembly/council
- 23 youth involved in language classes

#### **Healing & Restorative Justice**

24 – healing circles & participation

#### **Maintaining Traditional Practices**

- 25 costs of Elder visits
- 26 costs of traditional education
- 27 local teachers in schools
- 28 cultural awareness programs

#### **Traditional Ways**

- 29 traditional education programs
- 30 people hunting and fishing
- 31 access to hunting and fishing
- 32 methods of hunting and fishing
- 33 Elder/youth in traditional activities

Identity & Culture >> Community Identity >> Spiritual Activities

**Issues Identified:** 

Spiritual activities that represent the beliefs of community members help to develop identity and common values and provide support for community members.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
3	# and type of spiritual activities and participation levels	Local survey required
4	# of visits by spiritual leader to community	Local survey required

## **Data Sources:**

Identity & Culture >> Community Identity >> Community Events

**Issues Identified:** 

Events within the community that bring people together help to develop social relationships and supports as well as community knowledge, identity and morale. It is important that there is accountability for funds raised at events.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
5	# and type of community events and participation levels	Local survey required
6	Transparency in use of funds raised at events	Local survey required

### **Data Sources:**

Identity & Culture >> Community Identity >> Community Morale

## **Issues Identified:**

Having a sense of belonging, pride and well-being within a community is an important factor in promoting positive activities and encouraging participation in community events. A sense of belonging is sometimes heightened by the remoteness of a community. A feeling of security is also very important for community morale.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
7	Indicator of 'feeling safe in the community'	Local survey required
8	Condition of buildings and grounds	Local survey required
9	Recognition of positive contributions (e.g. citizen of the month)	Local survey required

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
10	Distance from other communities	Local survey required

## **Data Sources:**

Identity & Culture >> Community Identity >> Communication

**Issues Identified:** 

The community's ability to share information with all members is important to generate awareness of community issues and foster community activities and involvement.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
11	Community newsletter (distribution method and #, # of copies read)	Local survey required

### **Data Sources:**

Identity & Culture >> Elders >> Involvement with Youth

**Issues Identified:** 

An emphasis is placed on building and maintaining relationships between Elders and youth to allow for the transmission of traditional culture, spirituality and language, and to maintain inter-generational ties.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
12	# of formal Elder/youth activities and participation levels	Local survey required
13	# of informal (e.g. fishing and hunting) Elder/youth activities	Local survey required

## **Data Sources:**

## Identity & Culture >> Elders >> Involvement in Community

Issues Identified:

The opportunity to have a social network and remain involved in the community allows Elders to pass on valuable knowledge to the community and improve community well-being.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
14	Social gathering places for Elders in community (e.g. coffee house)	Local survey required
15	# of community decisions with Elders' input	Local survey required

## **Data Sources:**

## Identity & Culture >> Elders >> Remain in Community

**Issues Identified:** 

Supports in the community that recognize the importance of caring for Elders allow for Elders to remain in the community and experience a good quality of life, despite health or other concerns. A great sense of loss is experienced when Elders pass away outside the community.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
16	# of Elders who must leave community for end of life care	Local survey required
17	# of support programs in the community for Elders (e.g. home care, palliative care, specialized senior housing)	Local survey required

## **Data Sources:**

Identity & Culture >> <u>Traditional Practices</u> >> **Spiritual** 

**Issues Identified:** 

Practicing and promoting traditional methods of spirituality supports traditional values and ways of life, offering a common vision and raising individual identity with the community and the environment.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
18	# of visits to community by Medicine man	Local survey required

### **Data Sources:**

Identity & Culture >> Traditional Practices >> Cultural

**Issues Identified:** Practicing and promoting traditional cultural practices is important to maintaining traditional values, beliefs

and lifestyle. Cultural activities develop community identity and morale among members.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
19	# of traditional cultural activities & participation (celebrations, rituals, culture camps)	Existing data found at:  A) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community

### **Data Sources:**

A) Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

Identity & Culture >> <u>Traditional Practices</u> >> **Language** 

**Issues Identified:** 

Language plays a central role in preserving First Nations' identity, philosophy/worldview and traditions; it is important to support traditional language use within the community (especially the youth).

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
20	% of youth who speak traditional language	Local survey required – suggested questions and existing data found at:  A) RHS (Adolescent survey): Question 12-What languages do you speak? (List of Aboriginal languages to check off) - Community level data for RHS survey exists: must be accessed by community.  B) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community
21	# of teachers who speak traditional language	Existing data found at:  B) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community
22	Language used in assembly/council meetings	Existing data found at:  B) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
23	# of youth involved in traditional language education	Existing data found at:  B) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community

### **Data Sources:**

A) RHS: First Nations and Inuit Regional Longitudinal Health Survey (Adolescence survey) - Question 12 Find source at: <a href="http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_youth\_questionnaire.pdf">http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_youth\_questionnaire.pdf</a> (no longer available online)

**B)** Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

Identity & Culture >> <u>Traditional Practices</u> >> **Healing & Restorative Justice** 

**Issues Identified:** Healing/restorative justice is a traditional practice that supports community responsibility and allows for

retention of community members.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
24	# of healing circles/ participation levels	Local survey required

### **Data Sources:**

## Identity & Culture >> <u>Traditional Practices</u> >> <u>Maintaining Traditional Practices</u>

**Issues Identified:** 

The costs of maintaining traditional culture can be a financial burden. Difficulties are experienced in hiring local teachers who can maintain language and culture among youth; promoting an understanding of traditional practices with others who come into the community is important in developing support for traditional ways.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
25	Costs of Elder visits (transportation, honorariums)	Local survey required
26	Costs of traditional education programs	Local survey required
27	% of local teachers in schools	Existing data found at:  A) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
28	# of cultural awareness programs delivered to service providers	Local survey required

## **Data Sources:**

**A)** Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

Identity & Culture >> <u>Traditional Practices</u> >> **Traditional Ways** 

**Issues Identified:** Practicing traditional ways of life such as hunting and fishing is a way to preserve cultural practices and

support self-sustainability.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	# of traditional education programs (skills, language)	Local survey required – suggested questions and existing data found at:
29		A) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community
		<b>D)</b> RHS Adolescent survey:  Question 14-Who helps you in understanding your culture? (List includes: My grandparents and Community Eldersamong other choices) - <i>Community level data for RHS survey exists: must be accessed by community.</i>
	% of people in community who hunt and fish	Existing data found at:
		<b>A)</b> <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community
		B) CBM (Adult and Youth surveys):  Q21-Did you go hunting for geese/ducks in the last year?  Q22-Did you go out to make dry-fish in the last year?  Q23-Did you go on the fall hunt to Artillery Lake this last fall?
30		Q26-How many caribou have you harvested in the last year?
		Q27-How many times have you taken youth caribou hunting in the last year?  C) EAGLE Health Survey:  Question 28-Does do any fishing?  Local survey required for hunting and fishing rights, as per community  Q29- What does do with the fish they catch? (List includes: Eat them; Share them; Give them away; Sell them; Throw them back; Other).

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
31	Access to hunting and fishing	Local survey required
32	Methods of hunting, fishing and food preparation	Local survey required
33	# of traditional activities involving Elders and youth	Local survey required

### **Data Sources:**

A) Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

**D)** RHS: First Nations and Inuit Regional Longitudinal Health Survey - Question 14 <a href="http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_youth\_questionnaire.pdf">http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_youth\_questionnaire.pdf</a> (no longer available online)

Identity & Culture >> Community Knowledge >> Cultural Knowledge (Elders)

**Issues Identified:** 

Understanding cultural knowledge is a way to develop an identity and shared vision within a community; it also allows for Elders to pass on knowledge and develop inter-generational ties.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	# of formal Elder/youth activities and participation levels	See Indicator 12
	# of informal (i.e. fishing and hunting) Elder/youth activities	See Indicator 13
	# of community decisions with Elders' input	See Indicator 15

## **Data Sources:**

See for indicators 12, 13 & 15

Identity & Culture >> Community Knowledge >> Recognition of Multi-Cultural History

**Issues Identified:** 

Recognizing and celebrating the multi-cultural aspects of a community can help bring people together despite differences, and helps to educate community members about different cultures and ways of life.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
34	# of cultural awareness events and # of cultures explored (e.g. Mosaic Days)	Local survey required

### **Data Sources:**

Identity & Culture >> Community Knowledge >> Knowledge of Community History

**Issues Identified:** 

Understanding community history is important to inform community members about their community and background. The ability to know who you are and where you come from is important to developing a sense of belonging and identity.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	# of traditional education programs	See Indicator 29
	% of local teachers in schools	See Indicator 27

### **Data Sources:**

See for indicators 27 & 29

Identity & Culture >> Community Knowledge >> Promotion of Community

**Issues Identified:** 

The ability for the community to promote itself to outside sources that can assist in achieving more cultural awareness and promotion of traditional practices. The promotion of community events within and outside the community is important to attract participation and help develop relationships.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
35	Applying and receiving grants to support knowledge building programs	Local survey required
36	Approach mines to invest in community	Local survey required

## **Data Sources:**

Identity & Culture >> Sharing >> Parenting

**Issues Identified:** 

Shared parenting is a sense of responsibility to all youth in the community, it is an important traditional value that assists the community in being responsible for each other and looking out for one another's well-being.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	None proposed	Local survey required

## **Data Sources:**

Identity & Culture >> Sharing >> Volunteerism

**Issues Identified:** 

Volunteers are important for a community to operate successful programs and lower the cost of maintaining their community. Volunteering shows a sense of responsibility and care for your community that develops from having a strong identity.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
37	# of volunteers for community events	Local Survey required
38	Level of informal volunteering (assisting Elders, helping others with building projects, etc.)	Local survey required

## **Data Sources:**

Identity & Culture >> Sharing >> Resources

**Issues Identified:** 

Sharing resources such as food and labour is important to provide well-being to the entire community, especially when individuals are experiencing difficult living situations. Sharing also exemplifies the collective spirit of the community and the amount of compassion for fellow community members.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
		Local survey required – suggested questions:
	Game shared after	A) EAGLE Health Survey:
39	Game shared after hunts	Q29- What does do with the fish they catch? (List includes: Eat them; Share them; Give them away; Sell them; Throw them back; Other).

### **Data Sources:**

A) Eagle Project Health Survey: Chiefs of Ontario, Environment Department. 2001. EAGLE Project Health Survey. <a href="http://chiefs-of-ontario.org/Assets/Documents/Environment/ehs2.pdf">http://chiefs-of-ontario.org/Assets/Documents/Environment/ehs2.pdf</a>

## **Tool Sheet – Identity & Culture**

Identity & Culture >> Traditional Practices >> Language

**Issues Identified:** Language plays a central role in preserving First Nations identity,

philosophy/worldview and traditions; it is important to support traditional

language use within the community (especially the youth).

**Proposed Indicator:** # 20 – % of youth who speak traditional language

Suggested Measure: Compare the number of youth who speak their traditional language with the

number who do not.

**Information Source:** Existing data and suggested questions that could be used in a local survey

are provided below. Limitations to the existing data are noted below (see \*).

A) RHS (Adolescent survey): <a href="http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_youth\_questionnaire.pdf">http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_youth\_questionnaire.pdf</a> (no longer available online)

Question 12 - What languages do you speak? (A list of Aboriginal languages to check off is provided)

Note: Community level data for RHS survey exists; must be accessed by community.

The following related data also exists from the RHS (adolescent survey):

Question 9 – What language do you most often use in daily life?

Question 10 – How important is it to you to speak your First Nations/Inuit language?

Question 11 – What languages do you understand?

B) <a href="http://www.statscan.gc.ca">http://www.statscan.gc.ca</a> >> (English / French) >> Community Profiles >> 2001 Aboriginal Peoples Survey Community Profiles or 2001 Aboriginal Population Profile >> Child / Saskatchewan / Choose a community

% of children who can speak or understand an Aboriginal language
Importance of child speaking and understanding an Aboriginal language:
Very important or somewhat important (%)
Not very important or not important (%)
% of children who understand an Aboriginal language:
Very well or relatively well
With effort / A few words / Not well at all
% of children who can speak an Aboriginal language:
Very well or relatively well
With effort / A few words / Not well at all
% of children who receive help learning an Aboriginal language from:
Grandparents
Parents
Aunts and uncles
School teachers
Other persons

#### How to use this measure:

- **Step 1)** Identify the number of youth in the community.
- Step 2) Identify the number of youth who speak their traditional language, by using existing data (as in the table above) or by conducting a local survey. Suggested survey questions can be found in the Regional Health Survey (RHS) as well as the 2001 Aboriginal Peoples' Survey Community Profiles.
- Step 3) Use the 'Indicator Calculation Tool' formula to calculate the measure.

Indicator Calculation Tool	Calculation Example
( ) # of youth who speak their traditional language	( 225 ) youth who speak their traditional language
( ) # of youth in the community	( 300 ) youth in the community
(_) (_) <b>X</b> 100 = % who speak traditional language	225 300 = .75 <b>X</b> 100 = 75% speak traditional language
X = multiplied by ( ) = Insert number here	= divided by

#### What does this information mean?

Although this information indicates the number of youth who speak the language, more information would be needed to determine the frequency of use and fluency. Understanding the extent to which the traditional language is being passed on to youth could be used to determine the effectiveness of existing cultural and language programs and events, and to support proposals for traditional language education in the schools.

### \* Limitations of the Existing Data:

As not all community members took part in the Regional Health Survey or the 2001 Aboriginal Peoples' Survey, the data may not accurately reflect the participation levels in a particular community, and should be used with caution.

Food security is defined as the ability to identify and access nutritious food that will contribute to a healthy lifestyle. Food security takes into account the cost of food, access to nutritious food, use of traditional foods, and the relationship of food to one's health.

## **Indicators:**

### Cost of Food

#### **Cost of Food**

no indicators proposed

### **Cost of Healthy Food**

no indicators proposed

#### **Food Subsidies**

- 1 availability and use of food programs
- 2 incentives to carry healthy food

### **Competitive Retailing**

3 – level of retailer competition

### **Availability & Quality of Food**

### **Competitive Retailing**

- 4 food delivery times
- 5 delayed or lost shipments
- 6 availability of fresh vs. unhealthy food
- 7 food received in poor/unfit condition
- 8 compensation for unfit shipments

### **Traditional Foods**

- 9 levels of hunting and fishing
- 10 traditional food availability

#### **Nutrition Education**

- 11 nutrition education programs
- 12 cooking classes

### **Food Programs**

13 – snack programs at schools/events

#### **Collective Action**

- 14 bulk food ordering/purchasing
- 15 Good Food Box program
- 16 food programs

Food Security >> Cost of Food >> Cost of Food

**Issues Identified:** *Cost of food in all categories in northern communities is high, especially in relation to income levels.* 

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	None proposed	Local survey required – suggested measures found at:
		A) Refer to the DIAND Alternative Northern Food Baskets publication (listed in references). Calculating the cost of a northern food basket involves complex calculations.
		<b>B)</b> Healthy Food Costing Assessment - Healthy Food Costing Assessment (Community Vitality Monitoring Partnership Process project). Involves detailed calculations.

### **Data Sources:**

A) Lawn, Judith and Hill, Frederick. 1998. Alternative Northern Food Baskets. Ottawa: Minister of Indian Affairs and Northern Development

**B)** Community Vitality in Northern Saskatchewan. Third Annual Report of the Community Vitality Monitoring Partnership Process 2001. **D)** Nutrition and Food Security in Kugaaruk, Nunavut - Questions 403/602/603 Find source at: <a href="http://www.ainc-inac.gc.ca/nth/fon/pubs/kg03/kg03-eng.pdf">http://www.ainc-inac.gc.ca/nth/fon/pubs/kg03/kg03-eng.pdf</a>

Food Security >> Cost of Food >> Food Subsidies

**Issues Identified:** There is a lack of food subsidy programs – the existing Food Mail program is not widely known or understood

and is not directly accessible by community members. Incentives do not exist to encourage stores to carry

healthy food products.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
1	# and use of food programs	Local survey required – suggested questions:  A) Food Quality in Labrador study (retailer survey): If the quality of fresh fruit and vegetables improved in your store, do you think you would sell more of these foods?  B) Nutrition and Food Security in Kugaaruk survey: Where do you usually buy most of your food? From the Coop, from Yellowknife by Food Mail, or from the south by air cargo?
2	Incentives for stores to carry healthy food items	Local survey required – suggested questions:  B) Food Quality in Labrador study (retailer survey):  - If the quality of fresh fruit and vegetables improved in your store, do you think you would sell more of these foods?  - If the quality of fresh food improved, would you: increase prices because customers would be willing to pay more? Lower prices, because you would have less spoilage? Continue to charge the same price?

#### **Data Sources:**

A) Nutrition and Food Security in Kugaaruk, Nunavut. - Questions 500

 $Find \ source \ at: \ \underline{http://www.ainc-inac.gc.ca/nth/fon/pubs/kg03/kg03-eng.pdf}$ 

B) Food Quality in Six Isolated Communities in Labrador. - Questions 6/7

Find source at: http://www.ainc-inac.gc.ca/nth/fon/pubs/survfoo2001/survfoo2001-eng.pdf

Food Security >> Cost of Food >> Competitive Retailing

**Issues Identified:** Food costs were reduced in communities where there was competition between retailers.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
3	# of food retailers in the community for specific commodities	Local survey required

## **Data Sources:**

## Food Security >> Availability & Quality of Food >> Food Transportation

#### **Issues Identified:**

Transporting food to northern communities affects the cost, quality and availability of food for community members. Nutritious perishable foods are expensive to ship and vulnerable to damage from poor handling. As a result, store shelves are stocked with more easily transported, but less nutritional convenience foods. Transportation inefficiencies and poor handling procedures cause spoilage and delayed or lost shipments, resulting in increased cost and poorer food quality for northern residents. As well, community members feel there is a lack of respect by food handlers and distributors toward food destined to the north.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
4	Length of time for food to be delivered	Local survey required
5	# of delayed or lost shipments	Local survey required
6	Amount of nutritious fresh food available for purchase vs. less nutritious foods	Local survey required

		Local survey required – suggested questions:
7	% of perishable food received in poor condition or not fit for consumption	A) Food Quality in Labrador study (retailer survey):  - How would you describe the quality of the following kinds of food sold in your community? (List of fresh fruits/vegetables to choose from)  - Since this time last year, has the quality of food in your community improved a lot, improved a little, stayed the same, become worse?  - When do you find the quality of food to be best and worst?  - How often do you get complaints from customers about food quality?  - What do you think is the main cause of the problems you have with the quality of fresh food at this time of the year? (list of reasons)  - How much of the following foods have you thrown out because of poor quality or spoilage in a typical week? During the past three months? (list and amounts provided)  - Can you list the foods where you have the greatest problem with quality?  - Compensation information source: food handler company.
8	Compensation provided for food lost or received in condition not fit for consumption	Local survey required

## **Data Sources:**

**A)** Food Quality in Six Isolated Communities in Labrador. (Retailer survey questions 1/45/8/9/10/11)

Find source at: <a href="http://www.ainc-inac.gc.ca/nth/fon/pubs/survfoo2001/survfoo2001-eng.pdf">http://www.ainc-inac.gc.ca/nth/fon/pubs/survfoo2001-eng.pdf</a>

Food Security >> Availability & Quality of Food >> Traditional Foods

**Issues Identified:** Making use of local food resources such as fish and wild game provides healthy food and ensures food is not subjected to transportation problems.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	Levels of hunting and fishing	Local survey required – suggested questions and existing data found at:
9		A) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community
10	Traditional foods available by season	Local survey required

### **Data Sources:**

Food Security >> Availability & Quality of Food >> Nutrition Education

**Issues Identified:** 

Access to nutritional information is seen as important to assist community members in making informed and healthy food choices. Demand for healthy food can mean more healthy food is available for purchase.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
11	# of nutrition education programs and attendance	Local survey required
12	# of cooking classes & attendance	Local survey required

### **Data Sources:**

Food Security >> Availability & Quality of Food >> Food Programs

**Issues Identified:** Community food programs that provide nutritious food at schools and events are seen as a direct way of

ensuring that community members are eating healthy.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
13	# and quality of snack programs in school / at events	Local survey required

## **Data Sources:**

Food Security >> Availability & Quality of Food >> Collective Action

**Issues Identified:** Communities who act strategically and cooperatively to address food issues can reduce the cost and improve the quality of the food available.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
14	Bulk ordering and purchase of food	Local survey required
15	Good Food Box program and participation	Local survey required
16	# of community food programs and participation	Local survey required

### **Data Sources:**

## **Tool Sheet – Food Security**

## Food Security >> Availability & Quality of Food >> Nutrition Education

**Issues Identified:** Access to nutritional education is seen as important to assist community

members in making informed and healthy food choices. Demand for healthy

food can mean more healthy food is available for purchase.

**Proposed Indicators:** # 11 – # of nutrition education programs and attendance levels

# 12 - # of cooking classes

Suggested Measures: 1) Compare the number of nutrition programs available to the number required

to address nutrition education needs in the community.

2) Compare the desired participation rates in nutrition programs with current

participation rates.

Information Source: Local survey

**Note:** The nutrition programs offered in the calculation tools can be exchanged with cooking classes. They could also be specific to a certain group such as Elders or pre-natal women, or related to specific community health needs.

#### How to use measure #1:

- **Step 1)** Identify the # (number) of nutrition programs needed within the community and the spaces needed within those programs.
- Step 2) Identify the # of nutrition programs offered.
- Step 3) Use the 'Indicator Calculation Tool #1' formula to calculate the measure.

Indicator Calculation Tool #1	Calculation Example
( ) # of nutrition programs offered X ( ) spaces  ( ) # of nutrition programs needed X ( ) spaces  ( )  ( )  X 100  = % needed programs available	(2) nutrition programs offered <b>X</b> (10) spaces  (3) nutrition programs needed <b>X</b> (10) spaces
X = multiplied by ( ) = Insert number here	= divided by

#### What does this information mean?

Two-thirds (67%) of the nutrition education needs within the community are being met by current programming. This information could be used to identify and support strategies to address educational gaps. Strategies may include program evaluation, program consolidation or proposals for additional programs and funding.

### How to use measure #2:

- **Step 1)** Identify the desired rate of participation in a particular nutrition program. This could also be broken down to a specific group (Elders, pre-natal women, etc.).
- **Step 2)** Determine the current rate of participation in the program for the specific group, by using statistics collected by the program, or by conducting a local survey.
- Step 3) Use the 'Indicator Calculation Tool #2' formula to calculate the measure.

Indicator Calculation Tool #2	Calculation Example
( ) current # of community members participating in program	( 75 ) community members participating in program  ( 180 ) desired community members participating in
( ) desired # of community members participating in program  ( ) ( ) X 100 = % participating	program
X = multiplied by ( ) = Insert number here	= divided by

#### What does this information mean?

Of the identified 180 community members who would benefit from the program, only 75 or 42% are participating. This information can be used to identify the need for further research to find out why the participation rate is low and to develop and support strategies to increase attendance.

## **Services & Infrastructure**

Defined as the availability and access to services and related infrastructure; respectfully delivered health and human services; adequate and affordable housing, recreation facilities and programming; and specialized services designed to meet the needs of Elders and youth.

### **Indicators:**

Commui	aitv	Infrac	tructuro
Commu	IIΙV	IIIIII as	ucture

#### Sewer & Water

- 1 houses with/without water & sewer
- 2 water borne illnesses
- 3 houses relying on bottled water

#### **Locally Staffed**

- 4 treatment facilities without staff
- 5 facility staff from community
- 6 community staff training levels

Indicator #2

#### Roads

- 7 accidents on roads
- 8 repairs due to road conditions

### Service Delivery

#### Local

- 9 services available in community
- 10 health professionals in community
- 11 visits by health professionals
- 12 local service usage
- 13 community training in ERT
- 14 distance from services

#### Consistent

- 15 frequency of health service delivery
- 16 scheduled services delayed
- 17 time to complete treatment plans
- 18 treatment completed/compromised

#### Compassionate

- 19 wait time for appointment transport.
- 20 compassionate policy exceptions
- 21 cultural awareness programs

#### Confidential

- 22 service confidentiality guidelines
- 23 staff trained on confidentiality

#### Youth

- 24 specific services for youth
- 25 new funds for youth programs
- 26 youth addiction treatment facilities

#### **Elders**

27 – medical translator/companion

- 28 meals on wheels program
- 29 social gathering place for Elders
- 30 programs & activities for Elders
- 31 local palliative care for Elders

#### Infrastructure

- 32 size/capacity of facility
- 33 suitability of facility
- 34 facility usage
- 35 proper equipment for facility

#### Housing

### **Availability**

36 – residents per house

... continued on next page

37 – generations per house	53 – programs with proper equipment	72 – utilization of existing resources	Jurisdiction Fragmentation
38 – Tuberculosis rates	Programming		86 – # agencies involved in funding
39 – housing waiting lists	54 – activities available	<u>Technology</u>	87 – resources allocated to administration
Quality	55 – summer activities available	Current	Participation
40 – houses in need of repair	56 – programs cancelled	73 – water/sewer technology used	88 – service staff from community
41 – quality of housing insulation	57 – participation & retention levels	High Speed Internet	89 – staff turnover rates
42 – presence of black mold	58 – age range of participants	74 – internet use in the community	90 – mechanisms for participation
43 – frequency of sewer back-ups	Staffing	75 – internet technology at health facility	91 – health education and awareness
44 – accidents in the home	59 – funding for trained staff	76 – distance education enrolment	Collaboration
45 – EHO inspector visits	60 – programs run by staff vs. volunteers	77 – internet reliability	92 – community inter-agency meetings
Elders	61 – range of programs offered	Data Management	93 – regional inter-agency meetings

47 – house maintenance for Elders	63 – support for recreation staff		Communication
Affordable	Youth	Service Sustainability	95 – community newsletter
48 – low cost housing units	64 – youth centre in community	Sufficient Funding	96 – community meetings
49 – % of income required for housing	65 – youth involved in programs	78 – levels of program/service funding	Realistic
Jurisdiction Fragmentation	66 – school drop out rates	79 – program needs met by funding	Indicator #12
50 – agencies responsible for housing	67 – school absentee rates	80 – vacant positions	97 – proximity of duplicate services
51 – time to complete house repairs	68 - youth alcohol and drug use	Stable Funding	98 – medical transport driver/patient ratio
Ownership	Promotion	81 – long term vs. short term funding	99 – funder cutbacks re: abuse perception
no indicators proposed	Indicators #54, 57, 58	82 – duration of programs	Staffing
	69 – direct contacts to provide information	83 – programs cancelled	Indicator #21
Recreation	Affordable	84 – staff turnover rates	
Facilities	70 – cost of recreation to users	Indicator #80	
52 – type/condition of recreation facilities	71 – volunteers assisting with programs	85 – funding commitments honoured	

## **Services & Infrastructure**

Services & Infrastructure >> Community Infrastructure >> Sewer & Water

**Issues Identified:** Communities require adequate sewer and water treatment systems that use proper technology, meet current standards and are operated and maintained by trained staff.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
1	# of houses with/without adequate sewer and water services	<ul> <li>Local survey required – suggested questions and existing data found at:         <ul> <li>A) RHS (Adult survey):</li> <li>What is the main water supply for your household? (List includes: local/community water supply; trucked, well; collect yourself from water plant; collect yourself from river, lake, pond; from a neighbour's house)</li> <li>Do you use any other sources of drinking water? (List includes: bottled water, water from another house, boiled tap water, river lake or stream).</li> <li>Do you consider the main water supply in your home safe for drinking? - Community level data for RHS survey exists: must be accessed by community.</li> </ul> </li> <li>B) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> &gt;&gt; (English / French) &gt;&gt; Community Profiles &gt;&gt; 2006 Aboriginal Peoples Survey Community</li> </ul>
2	# of illnesses caused from water borne diseases	Profiles or 2006 Aboriginal Population Profile >> Choose a community  Existing data found at:  B) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Population Profile >> Choose a community  Profiles or 2006 Aboriginal Population Profile >> Choose a community
3	# of houses relying on purchased drinking water	Local survey required

### **Data Sources:**

A) RHS: First Nations and Inuit Regional Longitudinal Health Survey (Adult survey) - Questions 29/30/31 Find source at: <a href="http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_adult\_questionnaire.pdf">http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_adult\_questionnaire.pdf</a> (no longer available online)

**B)** Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

## **Services & Infrastructure**

Services & Infrastructure >> Community Infrastructure >> Locally Staffed

**Issues Identified:** 

Operation and maintenance of critical infrastructure (sewer & water) should be carried out by trained community members to avoid gaps in service that occur due to staff turnover and scheduling of outside staff.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
4	# of instances where treatment facilities are without staff members	Local survey required
5	# of community members who are employed in water/sewer facilities	Local survey required
6	% of community staff who are properly trained	Local survey required

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	# of illnesses caused from water borne diseases	See Indicator 2

Services & Infrastructure >> Community Infrastructure >> Roads

**Issues Identified:** The quality of roads, both within communities and between communities where roads exist, is often poor, increasing the cost of vehicle maintenance and reducing mobility.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
7	# of accidents on roads	Local survey required
8	# of vehicle repairs due to road conditions	Local survey required

#### **Data Sources:**

Services & Infrastructure >> Service Delivery >> Local

**Issues Identified:** 

Wherever possible, services should be available locally to enable people to remain in their communities. Where services have to be "brought in" to a community they should be designed to accommodate that purpose (i.e. mobility of health professionals). Community members should be trained in critical incident response in communities without resident trained personnel.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
9	# of services available in the community	Local survey required
10	# of health professionals who live in the community	Local survey required
11	# of health professional visits to the community	Local survey required

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
12	# of trips outside of community for service that is available locally	Local survey required
13	# of community members trained in ERT / First Responders; # training opportunities	Local survey required
14	Distance from services	Local survey required

Services & Infrastructure >> Service Delivery >> Consistent

**Issues Identified:** Services need to be regularly scheduled so that people know when they are available, and should be offered as

scheduled, without changes, delays or cancellations.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
15	Frequency of (health) service delivery	Existing data found at: <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community
16	# of scheduled services changed, delayed or cancelled	Local survey required
17	Time period to complete treatment plans	Local survey required
18	# of treatment plans completed vs. compromised	Local survey required

#### **Data Sources:**

A) Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

Services & Infrastructure >> Service Delivery >> Compassionate

Issues Identified:

Services delivered both within and outside the community should be delivered with compassion, respect and cultural awareness. Services should be designed (and modified as required) to minimize undue inconvenience and hardship for clients.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
19	Waiting time for transportation from doctor appointment back to community	Local survey required
20	# of policy exceptions requested / granted for compassionate reasons	Local survey required
21	# of cultural awareness programs & attendance rates	Local survey required

#### **Data Sources:**

Services & Infrastructure >> <u>Service Delivery</u> >> **Confidential** 

**Issues Identified:** *Services should be delivered in a confidential and professional manner.* 

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
22	# of services with confidentiality guidelines	Local survey required
23	# of staff trained on guidelines	Local survey required

#### **Data Sources:**

Services & Infrastructure >> Service Delivery >> Youth

**Issues Identified:** Specific services for youth are essential to keep youth engaged and healthy; those identified included a youth centre and targeted recreation, addictions, culture, mentoring and education programs.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
24	#, type and use of specific youth services, programs & facilities	Local survey required
25	Amount of new funds for youth programs (not reallocated funds)	Local survey required
26	Youth addiction treatment centre and/or mobile program	Local survey required

Data Sources: No indicator/survey source at this time

Services & Infrastructure >> Service Delivery >> Elders

**Issues Identified:** Services for Elders are seen as very important to ensuring they are involved in the community, are involved

with youth, and have the necessary supports to allow them to remain in the community as they grow old.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
27	Medical translation & companion services available and funded	Local survey required
28	Meals on wheels program in community	Local survey required
29	Social gathering place for Elders (e.g. coffee house)	Local survey required

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
30	# and type of activities and programs for Elders & participation	Local survey required
31	Palliative care available in community	Local survey required

Services & Infrastructure >> <u>Service Delivery</u> >> **Infrastructure** 

**Issues Identified:** Services require suitable infrastructure to carry out identified activities (buildings, equipment, supplies).

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
32	Size / capacity of facility	Local survey required
33	Suitability of facility (daycare has windows)	Local survey required
34	Usage rates of facility (can indicate suitability)	Local survey required
35	Facility has proper equipment for designed use	Local survey required

Data Sources: No indicator/survey source at this time

Services & Infrastructure >> Housing >> Availability

Issues Identified:

A lack of housing units results in overcrowding, contributing to increased incidence of communicable diseases (esp. tuberculosis, and mental health issues (stress, alcohol & drug abuse). Loss of a housing space is a deterrent to those who wish to move temporarily from the community to pursue education.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
36	# of residents per house	Local survey required – suggested questions and existing data found at:  A) RHS (Adult survey):  - How many children usually live in this household?  - Including yourself, how many adults live in this household?  - How many rooms are in your home? - Community level data for RHS survey exists: must be accessed by community.  B) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community
37	# of generations per house	Local survey required
38	Tuberculosis rates	Local survey required
39	Housing waiting lists	Local survey required

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)

A) RHS: First Nations and Inuit Regional Longitudinal Health Survey (Adult survey) - Questions 19/20/25 Find source at: <a href="http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_adult\_questionnaire.pdf">http://www.rhs-ers.ca/english/pdf/rhs2002-03\_files/questionnaires/rhs2002-03\_adult\_questionnaire.pdf</a> (no longer available online)

**B)** Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

Services & Infrastructure >> Housing >> Quality

**Issues Identified:** Many housing units are in disrepair, some without proper services such as sewer and water. Houses in poor condition contribute to accidental injuries and health hazards.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
40	# of housing repairs needed	Local survey required – suggested questions and existing data found at:  A) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community
41	Housing insulation quality	Local survey required
42	Presence of black mold	Local survey required
43	Frequency of sewer backups	Local survey required
44	# of accidents in the home	Local survey required

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
45	# of visits from EHO inspectors	Local survey required

**A)** Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

Services & Infrastructure >> Housing >> Elders

**Issues Identified:** Housing that meets the special needs of Elders (mobility, restricted vision) is required along with programs that support Elders to remain in their homes and community.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
46	# of housing units specifically designed or modified for Elders	Local survey required
47	Level of assistance with house maintenance for Elders	Local survey required

#### **Data Sources:**

Services & Infrastructure >> Housing >> Affordable

Issues Identified:

An overall scarcity of housing units contributes to higher rents and a further lack of low-income housing units contributes to overcrowding, as those with low incomes move in with other family members. Frequent moves in search of better housing increases costs (i.e. re-hookup of utilities).

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
48	# of low cost housing units	Local survey required
49	% of income required for housing	Local survey required

#### **Data Sources:**

Services & Infrastructure >> <u>Housing</u> >> **Jurisdiction Fragmentation** 

**Issues Identified:** Responsibility for provision and maintenance of housing units is multi-jurisdictional and results in gaps in availability and quality of housing.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
50	# of agencies responsible for housing	Local survey required
51	Time period to complete housing repairs	Local survey required

#### **Data Sources:**

Services & Infrastructure >> Housing >> Ownership

**Issues Identified:** Unavailability of serviced lots for individual purchase and difficulties in obtaining financing are challenges to home ownership.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
		Existing data found at:
	None proposed	A) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community

#### **Data Sources:**

**A)** Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

Services & Infrastructure >> Recreation >> Facilities

**Issues Identified:** Appropriate, well-maintained facilities are required to house recreation and leisure activities. Proper equipment is also needed for the activities to take place.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
52	# and type and condition of recreational facilities in the community	Local survey required
53	% of programs with proper equipment	Local survey required

#### **Data Sources:**

Services & Infrastructure >> Recreation >> Programming

**Issues Identified:** 

A range of recreation and leisure programs should allow for all community members to be involved in activities, facilitating year-round use (not just linked to school year) in all environments. Programs must be dependable - short term programs discourage participation.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
54	# and type of activities available	Local survey required
55	# of activities available during summer months	Local survey required
56	# of programs cancelled	Local survey required
57	Participation & retention levels	Existing data found at:  A) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
58	Age range of participants in specific (i.e. using ice rink) and overall activities	Local survey required

A) Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

Services & Infrastructure >> Recreation >> Staffing

**Issues Identified:** Funds must be available to hire staff who are trained in Recreation Services and can properly design, deliver

and promote a broad range of programs and understand how to motivate and retain participation.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
59	Funding available to hire trained staff	Local survey required
60	# of programs run by trained staff vs. volunteers	Local survey required
61	Range of programs offered	Local survey required
62	Program participation & retention levels	Local survey required

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
63	Level of support for recreation staff	Local survey required

Services & Infrastructure >> Recreation >> Youth

**Issues Identified:** 

Providing recreational opportunities for youth is seen as one of the most important ways to keep youth engaged in the community and to provide an alternative to drug and alcohol use. A youth centre is seen as a critical facility.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
64	Youth centre in community	Local survey required
65	% of youth involved in programs	Local survey required
66	School drop out rates	Local survey required
67	School absentee rates	Local survey required

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
68	Levels of alcohol & drug use among youth	Local survey required

A) Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

Services & Infrastructure >> Recreation >> Promotion

**Issues Identified:** Programs must be promoted to build community support and participation. Individual contact is seen as

important, as well as a group participation approach to keep up motivation (i.e. walking group).

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	# and type of activities available	See Indicator 54
	Program participation & retention levels	See Indicator 57
	Age range of participants	See Indicator #58
69	# of direct contacts to provide information on activities	Local survey required

Data Sources: No indicator/survey source at this time

Services & Infrastructure >> Recreation >> Affordable

**Issues Identified:** Services and programs must be affordable for community members as user fees can be a deterrent to usage. Finding ways to utilize the resources within the community can reduce funding requirements.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
70	Cost of recreation activities to users	Local survey required
71	# of volunteers assisting with recreation programs	Local survey required
72	# of existing community resources utilized for recreation (e.g. outside rink; field for ball diamond; walking trails; lake)	Local survey required

Data Sources: No indicator/survey source at this time

Services & Infrastructure >> Technology >> Current

**Issues Identified:** Communities must have access to appropriately current technology (structures, systems, processes, equipment and training) to properly operate and maintain services and infrastructure.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
73	Water & sewer treatment technologies in use	Local survey required

#### **Data Sources:**

Services & Infrastructure >> <u>Technology</u> >> **High Speed Internet** 

**Issues Identified:** 

Access to reliable high speed internet is crucial to enable the use of new technology in the health facility, to access distance educational opportunities, to access information and resources, and to facilitate a broad range of communication needs.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
74	Internet use in the community	Local survey required – suggested questions and existing data found at:  A) Aboriginal Peoples Adult Survey (Communications section, questions 4, 5): - In the past twelve months, did you use the Internet? - Where have you used the Internet in the past twelve months? Aboriginal Peoples Adult Survey (Education section, question 26) - Did you take any of your postsecondary courses by correspondence or through some other form of distance education? By "distance" we mean education received via mail or electronic media such as television, CD-ROM or the Internet?  B) <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a> >> (English / French) >> Community Profiles >> 2006 Aboriginal Peoples Survey Community Profiles or 2006 Aboriginal Population Profile >> Choose a community
75	Internet technology in use at health care facility	Local survey required

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
76	# of community members enrolled in distance education courses	Local survey required
77	# of minutes of interrupted/ unavailable internet service	Local survey required

- A) Statistics Canada: 2001 Aboriginal Peoples Survey (Adult) Question 4/5 (Communications Section) & Question 26 (Education Section)
- **B)** Statistics Canada: 2006 Community Profiles. Find source at: <a href="http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E">http://www12.statcan.ca/census-recensement/2006/dp-pd/prof/92-594/index.cfm?Lang=E</a>

Services & Infrastructure >> <u>Technology</u> >> **Data Management** 

Issues Identified:

Data collection systems and trained staff are required to collect and manage the information necessary to conduct needs assessments, obtain funding and other resources, provide accountability and conduct program evaluation.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	None proposed	Local survey required

#### **Data Sources:**

Services & Infrastructure >> Service Sustainability >> Sufficient Funding

**Issues Identified:** In order to be effective and produce desired outcomes, services require sufficient funding (budget) to carry out identified activities.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
78	Levels of program/ service funding	Local survey required
79	% of program/ service needs met by funding	Local survey required
80	# of vacant positions	Local survey required

#### **Data Sources:**

Services & Infrastructure >> Service Sustainability >> Stable Funding

**Issues Identified:** Services require stable, long-term funding to allow for planning and evaluation, and to develop community commitment and support. It is important that funding commitments made to communities are honoured.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
81	Duration dates of funding agreements	Local survey required
82	Duration of programs	Local survey required
83	# of programs cancelled	Local survey required
84	Staff turnover rates	Local survey required
	# of vacant positions	See Indicator 80

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
85	# of funding commitments met vs. not kept	Local survey required

Services & Infrastructure >> Service Sustainability >> Jurisdiction Fragmentation

Issues Identified:

Responsibility for services and programs is multi-jurisdictional and results in "patchwork" program and service delivery that is administratively intensive. A myriad of budget and statistical reporting requirements uses a great deal of the resources which could be spent on direct service or program delivery.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
86	# of agencies involved in funding specific/ overall services and programs	Local survey required
87	% of resources allocated to administration	Local survey required

#### **Data Sources:**

Services & Infrastructure >> Service Sustainability >> Participation

**Issues Identified:** 

Involving community (Aboriginal) members in service planning and delivery can ensure appropriate programs and services, minimize gaps in service created by staff turnover, provide employment, and build community support and capacity.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
88	# of community members employed/ involved in service delivery	Local survey required
89	Staff turnover rates	Local survey required
90	# and type of mechanisms for community participation (planning meetings, committees)	Local survey required

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
91	# of health education opportunities for community members	Local survey required

### **Data Sources:**

Services & Infrastructure >> <u>Service Sustainability</u> >> **Collaboration** 

**Issues Identified:** Communication and coordination of services within communities and between agencies, can improve the range of services and delivery options available.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
92	# of community inter-agency meetings	Local survey required
93	# of regional interagency meetings	Local survey required
94	# of collaborative service delivery initiatives	Local survey required

#### **Data Sources:**

Services & Infrastructure >> Service Sustainability >> Communication

**Issues Identified:** Communication must exist between service providers and the community to ensure members are aware of, use, and support the service.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
95	Community newsletter & distribution/ readership	Local survey required
96	# of community meetings held and attendance rates	Local survey required

#### **Data Sources:**

Services & Infrastructure >> Service Sustainability >> Realistic

**Issues Identified:** 

To realistically meet the needs of the community, factors such as service area population, demand, use, cost, proximity of like services, etc. must be considered in service planning and delivery. Awareness is needed of what constitutes abuse of services vs. acceptable use.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	# of trips outside of community for service that is available locally	See Indicator 12
97	Proximity of duplicate services	Local survey required
98	Medical transportation driver/patient ratio	Local survey required
99	# of funder cutbacks due to perception of abuse	Local survey required

Data Sources:		
No indicator/survey source at this time		

Services & Infrastructure >> Service Sustainability >> Staffing

#### **Issues Identified:**

High rates of staff turnover negatively impact programs in many ways including causing service gaps and reducing service dependability and usage. An understanding of cultural and geographic realities for non-Aboriginal and non-northern staff is seen as a way to reduce staff turnover and connect workers to the community.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
	# of cultural awareness programs & attendance rates	See Indicator 21

#### **Data Sources:**

### **Tool Sheet – Services & Infrastructure**

Services & Infrastructure >> <u>Service Delivery</u> >> **Medical Translation &**Companion Services

**Issues Identified:** Medical translation and companion services are important for the quality of

care, safety and comfort of community members traveling outside the community for medical services. With the assistance of a translator, Elders can communicate their needs and understand the care they receive. Safety issues for both Elders and youth can be addressed by traveling with a

companion, which can also reduce the stress of such trips.

**Proposed Indicator:** # 27 – Medical translation and companion services available and funded

**Suggested Measure:** Compare the number of medical trips where translation and/or companion

services are provided to the number of medical trips where these services were requested, or were deemed to be needed, but were not provided.

**Information Source:** Local survey

#### How to use this measure:

Step 1) Identify the # (number) of medical trips where translator or companion was requested or deemed to be needed, within a given timeframe. This could also be broken down by group (i.e. Elders, youth).

**Step 2)** Identify the # of trips where a translator or companion was provided and funded, within the timeframe (and for the specific group).

**Step 3)** Use the 'Indicator Calculation Tool' formula to calculate the measure.

Indicator Calculation Tool	Calculation Example
( ) trips - translator/companion provided	15 trips - translator/companion provided
( ) trips - translator/companion requested or needed but not provided	25 trips - translator/companion requested or needed but not provided
( ) <b>X</b> 100	25 .06 <b>X</b> 100
= % translation/companion needs met	= 60% translation/companion needs met
X = multiplied by ( ) = Insert number here	= divided by

#### What does this information mean?

Only ten percent (60%) of the needed or requested translation or companion services are being provided. This information could be used to demonstrate the need for more funded services, or to identify the level of service provided to particular groups, such as Elders.

Healthy lifestyles relate to positive personal life choices that include proper diet and physical activity and that build respectful healthy relationships with family and community. It involves making life choices that contribute to and foster the development of positive self-esteem within the individual.

### **Indicators:**

Self Care	4 – appointments kept vs missed	9 – participation in community events	<u>Motivation</u>
Healthy Eating	5 – comfort disclosing health issues	10 – organizing/volunteering at events	Programming
no indicators proposed	Healthy Home	Physical Activities	16 – activities available
Healthy Socializing	6 – keeping regular bedtime hours	11 – walking	17 – programs cancelled
no indicators proposed	7 – limiting TV/video game use	12 – weight and fitness training	18 – program participation and retention
Healthy Self-Image	Hygiene	13 – playing sports	19 – age range of participants
1 – girls saying no to sex	8 – practicing good personal hygiene	14 – skating	Promotion
Medical Treatment		Elders & Youth	20 – direct contacts to provide information
2 – taking medications as prescribed	<u>Participation</u>	15 – Elder/youth activities	<b>Environmental Concerns</b>
3 – attendance at support groups	Social Activities		21 – walking groups

Healthy Lifestyle >> Participation >> Elders & Youth

**Issues Identified:** Special progra

Special programs that encourage Elders and youth to engage in community activities and to spend time together are seen as important.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
15	# of activities where Elders and youth participate together	Local survey required

### **Data Sources:**

Healthy Lifestyle >> Motivation >> Programming

**Issues Identified:** A range of recreation and leisure programs should allow for all community members to be involved in

activities, facilitating year-round use in all environments. Programs must be dependable – short term programs

discourage participation.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
16	# and type of activities available	Local survey required
17	# of programs cancelled	Local survey required
18	Participation & retention levels	Local survey required
19	Age range of participants in specific and overall activities	Local survey required

#### **Data Sources:**

Healthy Lifestyle >> Motivation >> Promotion

**Issues Identified:** 

Programs must be promoted to build community support and participation. Individual contact is seen as important – community involvement to improve participation in activities can build community support.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
20	# of direct contacts to provide information on activities	Local survey required

#### **Data Sources:**

Healthy Lifestyle >> Motivation >> Environmental Conditions

Issues Identified: Environ

Environmental conditions such as weather, black flies and bears can reduce the motivation of community members to participate in outdoor activities; participating in groups is seen as safer.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
21	# of walking groups and # of outings	Local survey required

### **Data Sources:**

Healthy Lifestyle >> Motivation >> Affordability

**Issues Identified:** *Programs must be affordable for community members as user fees can be a deterrent to usage.* 

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
22	Cost of recreation activities to users	Local survey required
23	# of volunteers assisting with recreation programs	Local survey required

### **Data Sources:**

Healthy Lifestyle >> Motivation >> Early Engagement

**Issues Identified:** A focus on engaging youth in recreation and sports is important to set a lifelong pattern of physical exercise and to alleviate boredom.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
24	Youth participation rates	Local survey required
25	# of programs specific to youth	Local survey required
26	Recreation "leader" in community to inspire youth	Local survey required

#### **Data Sources:**

Healthy Lifestyle >> Motivation >> Nutrition / Fitness Awareness

**Issues Identified:** Awareness derived from nutrition and health education programs can motivate people to participate in physical activities and to eat healthy.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
27	Availability of nutrition/fitness programs and attendance levels	Local survey required

### **Data Sources:**

Healthy Lifestyles >> Participation >> Physical Activities

**Issues Identified:** Participating in recreational activities that involve physical exercise and

fitness.

Proposed Indicator: #13 – Playing Sports

Suggested Measure: Compare the desired participation rates in recreational activities with current

participation rates.

**Information Source:** Existing data and suggested questions that could be used in a local survey

are provided below. These are focused on children (6-14). Limitations to the

existing data are noted below (see \*).

A) RHS Adolescent/Adult/Child survey: <a href="http://www.rhs-ers.ca/english/pdf/rhs2002">http://www.rhs-ers.ca/english/pdf/rhs2002</a>

<a href="mailto:survey: http://www.rhs-ers.ca/english/pdf/rhs2002">online</a>)
<a href="mailto:survey: http://www.rhs-ers.ca/english/pdf/rhs2002">online</a>)
<a href="mailto:survey: http://www.rhs-ers.ca/english/pdf/rhs2002">online</a>)
<a href="mailto:survey: http://www.rhs-ers.ca/english/pdf/rhs2002">http://www.rhs-ers.ca/english/pdf/rhs2002</a>
<a href="mailto:survey: http://www.rhs-ers.ca/english/pdf/rhs2002">http://www.rhs-ers.ca/english/pdf/rhs2002</a>
<a href="mailto:survey: https://www.rhs-ers.ca/english/pdf/rhs2002">online</a>)
<a href="mailto:survey: https://www.rhs-ers.ca/english/pdf/rhs2002">online</a>)
<a href="mailto:survey: https://www.rhs-ers.ca/english/pdf/rhs2002">https://www.rhs-ers.ca/english/pdf/rhs2002</a>
<a href="mailto:survey: https://www.rhs-ers.ca/english/pdf/rhs2002">online</a>)
<a href="mailto:survey: https://www.rhs-ers.ca/english/pdf/rhs2002">https://www.rhs-ers.ca/english/pdf/rhs2002</a>
<a href="

Question 68 - Outside of school hours, how often do you: ...Take part in sports teams or lessons? *Note: Community level data for RHS survey exists; must be accessed by community.* 

B) <a href="http://www.statscan.gc.ca/">http://www.statscan.gc.ca/</a> >> (English / French) >> Community Profiles >> 2001 Aboriginal Peoples Survey Community Profiles >> Choose: Child / Saskatchewan / Choose a Community

How often child plays sports per week:		
	Never or less than once (%)	
	One or more times (%)	

**C)** For specific recreation information that includes past and upcoming events in the Athabasca region go to: http://www.nscrd.com/index.html

#### How to use this measure:

- Step 1) Identify the desired rate of participation in sports activities for the age group (example: 6-14; 15-18).
- Step 2) Determine the current rate of participation for the age group, by using existing data (as in the table above) or by conducting a local survey. Suggested survey questions can be found in the Regional Health Survey (RHS) as well as the 2001 Aboriginal Peoples' Survey Community Profiles.
- Step 3) Use the 'Indicator Calculation Tool' formula to calculate the measure.

Indicator Calculation Tool	Calculation Example
( ) current # of youth participating in sport activities  ( ) desired # of youth participating in sport activities  ( )  ( )  X 100  = % participating	(375) current # of youth participating in sport activities  (500) desired # of youth participating in sport activities
X = multiplied by ( ) = Insert number here	= divided by

#### What does this information mean?

Of the 500 identified as the desired participation number for the age group identified, 75% are currently participating in sports. This information could be used to set targets and determine what additional resources and strategies are needed to recruit the remaining 25% of youth into sports activities. Statistics on participation levels can be also used to support funding proposals.

#### \* Limitations of the Existing Data:

Existing data do not show the participation levels of all age groups, nor do they indicate the type of sports program or activities being participated in. As not all community members took part in the Regional Health Survey or the 2001 Aboriginal Peoples' Survey, the data may not accurately reflect the participation levels in a particular community, and should be used with caution.

### A. Introduction

#### Background

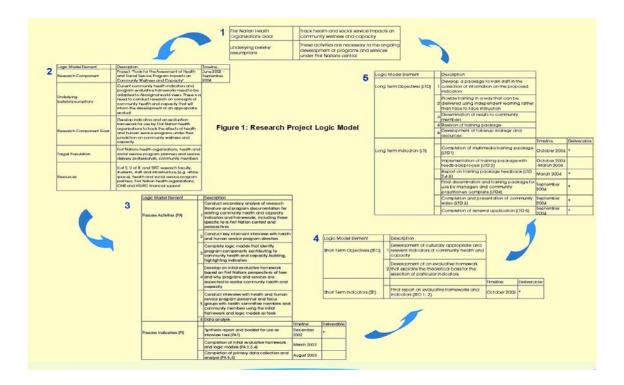

In the process of conducting the 2002 evaluation of transferred health services from First Nations and Inuit Health Branch (FNIHB) to the Prince Albert Grand Council (PAGC) in Saskatchewan, PAGC health managers expressed a desire to address questions beyond the scope and capacity of the evaluation but that they feel are relevant to the ongoing development of health services in their member communities. They were especially interested in the issue of the health effects of other human services (i.e. social development and recreation programs) on community wellness and capacity. PAGC health managers were especially interested in determining what information communities could collect to track and monitor their progress in the areas of community health and capacity outcomes.

This project, the <u>First Nation's Health Development: Tools for Program Planning and Evaluation</u>, builds on the 2002 evaluation to consider these issues. Here we describe the processes and activities undertaken between October 2002 and October 2005 to conduct the research.

#### **Project Objectives**

The objectives of this research project were to develop an evaluation framework and indicators for use by First Nations health organizations to track the effects of health and human service programs under their jurisdiction. Underlying the identification of appropriate indicators was the need to conduct research on local level concepts of community health and capacity to inform the development of an appropriate evaluative framework within which to situation programs, activities and indicators (see Figure 1).

Figure 1
Research Project Logic Model

#### Location

The research took place in communities selected by the community partners within the Prince Albert Grand Council district in the northern geographic area of Saskatchewan (see Appendix A). The PAGC communities included in this project were: Wahpeton Dakota Nation, Cumberland House Cree Nation, Red Earth Cree Nation, Fond du Lac Denesuline Nation, Black Lake Denesuline Nation and Hatchet Lake Denesuline Nation. During the time of this project, the newly formed Athabasca Health Authority (AHA), assumed responsibility for health service delivery in the Athabasca region (i.e., Black, Lake, Fond du Lac) and at the request of the Chief Executive Officer, we also included the three provincial communities serviced by AHA. These communities, with a significant population of First Nations and Aboriginal people, are Stony Rapids, Camsell Portage and Uranium City.

### **B. RESEARCH DESIGN**

### 1) Participatory Design

A participatory research design was used with a team that included university researchers and managers of three First Nations health organizations: the Prince Albert Grand Council (PAGC), the Athabasca Health Authority and the Northern Inter-Tribal Health Authority.

Individual communities were consulted prior to interviews to confirm their interest and participation in the project, and meetings were held throughout the duration of the project to provide regular updates to the First Nation research partners and community Health Directors.

Significant effort was made to keep the research process iterative, both by the strategies employed in data collection and analysis and by the participation process of the research communities. Community Health Directors and First Nations research partners provided advice and feedback at key points in the project, including reviewing focus group questions prior to their introduction in community meetings, and critiquing several iterations of the draft framework, indicators

### 2) Negotiating Community Consent

It was important to first introduce the project to potential participant communities before beginning data collection at any level. Because the Health Directors in each of the six First Nation communities had been identified as the key informants and community level contacts, a project presentation was made to a meeting of the Prince Albert Grand Council (PAGC) Health and Social Development Working Group (HSDWG), a forum in which all PAGC Health Directors participate. This group remained the main communication conduit for the participating communities. Meetings were also held with senior managers of PAGC, AHA and NITHA early on in the project.

In addition to the individual consent process for interviews and focus groups, we also negotiated community consent with the leadership of each of the participating First Nation communities. A Memorandum of Agreement to Participate (Appendix B) was developed for Health Directors to take to their leadership for review and approval. This document outlined both the assistance to be provided by the Health Directors to the project and the products the researchers and the project would return to the community.

Measures to ensure confidentiality were outlined in the ethics application approved by the university and communicated to the communities and research partners during the development of the Memorandum of Agreement to Participate, as well as during individual interviews and focus groups. Measures included a Confidentiality Declaration form signed by research team members and staff who would have access to the interview data. Confidentiality issues related to the small number of key informants were managed by ensuring that comments of individual participants would not be identifiable in reported findings. Interview data is kept in a locked cabinet at the SPHERU Prince Albert office. Interviews and focus group discussions were taped using digital recording equipment. We ensured that copies of digital files, both actual interview audio files and transcription files were deleted from any computers they may have been placed on for working purposes. A set of digital files is stored password-protected in the locked cabinet along with the interview transcriptions.

### 3) Data Collection & Analysis

The project included three levels of data collection:

- Collection and analysis of secondary data to create program logic models, and informal interviews with program managers to confirm logic model accuracy;
- Key informant interviews with Health Directors in each First Nation community;
- Focus groups with community members in six First Nation and three provincial communities to validate and expand the draft framework and indicators.

#### **Development of Logic Models**

The first step in the data collection involved obtaining information on health and human service programs delivered at the community level in order to build program logic models<sup>1</sup>. This was done both to help the researchers understand the community based programs and to provide an evaluation and planning tool to the program managers. A detailed description of a logic model is contained in Appendix C.

Although there were nine communities involved in the project, six First Nation and three provincial communities, logic models were created only for the programs delivered in the

First Nation's Health Development Project Methods

<sup>&</sup>lt;sup>1</sup> A logic model is a summarized graphical representation of the goals, objectives, resources, activities and anticipated outcomes of a program. It is normally displayed on one page and is used to assist with both the understanding and evaluation of programs.

First Nation communities. At the time that the logic models were created, nursing and professional health services (and other social program) were provided to the participating First Nation communities through the Prince Albert Grand Council and Bands provided para-professional health services.<sup>2</sup> Therefore, a level of autonomy exists around program design and spending for program managers at the local level. At this point in the process program information was collected at the Prince Albert Grand Council level (second level<sup>3</sup>) and later verified at the community level.

Program data was first collected through an examination of secondary data, or currently existing documentation, related to the Health, Social Development, Education, Justice and Economic Development programs. Second level service managers, who oversee the delivery of programs to the community, were contacted to inform them of the project and request program documentation. Materials such as organization charts, annual reports, program manuals, publications and pamphlets, work plans and daily activity logs were examined and from them the goals, resources, activities, and short- and long-term objectives of the programs were determined.

Unstructured interviews were held with second-level program managers to clarify and confirm our understanding of the programs. Drafts of the logic models were then returned to these managers who were asked to provide feedback to ensure they accurately reflected the programs. Revisions were made and a final set of logic models was created of all the programs that were delivered in each of the communities. A set of generic logic models, without community variation, was provided to the First Nation research partners; Prince Albert Grand Council (PAGC) the Athabasca Health Authority (AHA) and Northern Inter-Tribal Health Authority (NITHA).

In interviews with community Health Directors, the generic logic models were reviewed and revised to create a set of community-specific logic models, which included variations in program functioning specific to individual communities. Each community was provided with their set of logic models, along with a summary sheet highlighting program delivery information specific to their community.

First Nation's Health Development Project Methods

<sup>&</sup>lt;sup>2</sup> During the time that the study was conducted, the newly formed Athabasca Health Authority began to provide nursing and professional health services to the two First Nation communities (Fond du Lac, Black Lake) and provided all health services to the provincial communities of Stony Rapids, Camsell Portage and Uranium City. The two Bands continue to provide para-professional health services in these First Nation communities.

<sup>&</sup>lt;sup>3</sup> First level services are those delivered at the community level by community-based staff; second level services refer to the overall management of programs provided by the Prince Albert Grand Council to member communities.

A list of the programs that logic models were developed for is attached as Appendix D; Appendix E lists the source documents upon which the logic models were created. A set of generic logic models is included as Appendix F.

#### **Key Informant Interviews with Health Directors**

Phase I of the research strategy also involved collecting data from Health Directors in the six First Nation communities. Interview questions were developed by the research team (see Appendix G) and researchers travelled to the communities to conduct the interviews.

Part A of the interview questionnaire was designed to discover the major health issues within communities; how the concepts community wellness and community health are understood; how the concept of community capacity is understood and how it is seen to relate to community health; and to determine which domains of community health and capacity currently defined in the literature are relevant to First Nation communities, and if any new domains exist. Part B of the interview questions related to the logic models, which were reviewed and revised by Health Directors to reflect program delivery at the community level. Questions also addressed how the programs were seen to contribute to community health and capacity. Parts A and B were separated into two interview sessions.

Interview data were transcribed verbatim and the transcripts were mailed back to the participants for review and release. Transcripts were then revised if required, and analyzed using a grounded theory approach (Charmaz, 2000). Using a grounded theory approach means that interpretations are grounded in the experiences of those being interviewed, with the researcher consciously limiting preconceived notions about what the data might or should say. Grounded theory is especially useful in uncovering unanticipated themes and relationships. Grounded theory begins with assigning codes to text segments and initiates the interpretation or creation of themes. Coding can be done line-by-line or in blocks of text (Charmaz, 2000). Coding for this project was done in blocks of text in order to retain the context in which comments were made. A qualitative data analysis software package, Atlas.ti (versions 4.2 and 5.0) was used to support data management and analysis. Atlas.ti is a widely used program based on grounded theory (Barry, 1998) and is especially useful for managing the coding, analysis, and dissemination processes.

A preliminary analysis was completed for each community interview, beginning with the themes introduced by interview participants followed by themes drawn from the interview schedule. These summaries were then combined into one analytical document. From the

combined interview data, we created a draft framework, consisting of two diagrams that captured participant perspectives on the concepts of community health/wellness and capacity.

It was important that the framework be validated by the community-based Health Directors prior to presenting them at community focus groups, so a meeting was held to review the initial draft framework. From the feedback received at this meeting, revisions were made to the framework and a second meeting was held with Health Directors to approve this version.

Appendix H contains the final draft evaluative indicators framework created for presentation to the focus groups:

Diagram 1 - Concepts of Community Health and Community Wellness

Diagram 2 - Key Domains of Community Health and Community Wellness

#### **Focus Groups with Community Members**

Focus groups were held in each of the First Nation research communities as well as in the three provincial communities of Stony Rapids, Uranium City and Camsell Portage. In each instance community representatives (Health Directors in the First Nations communities) were contacted to assist with identifying participants and organizing the focus group meeting.

A total of 59 community members took part in ten (10) focus groups, with the number of participants in each ranging from a minimum of two to a maximum of ten (see Table 1).

Table 1 Focus Group Participants

Community Focus Groups	Participants N=59
Stony Rapids (AHA)	10
Stony Rapids (community)	7
Uranium City	3
Camsell Portage	4
Fond du Lac	9
Black Lake	8
Hatchet Lake	7
Cumberland House	5
Red Earth	3
Wahpeton	3
Totals:	59

Focus group participants were presented with the draft evaluative framework and were asked to respond with their views of community health and wellness (focus group questions are in Appendix I). Participants were also asked to express these views as additions or deletions to draft framework. As part of the discussion on each domain and issue, community-relevant indicators were often suggested by participants.

Focus group participants were also asked to comment on the presentation of the framework, and for their suggestions for appropriate graphics to use.

Interview data were transcribed verbatim and the transcripts were mailed back to the participants for review and release. Each participant was asked to edit only their comments, and not those of others in the group. Transcripts were then revised if required, and analyzed, again using a grounded theory approach.

Coding of the focus group data was done in blocks of text in order to retain the context in which comments were made. Each community's focus group transcript was analyzed for additions or deletions to the community health and capacity domains, and for new issues and indicators. A table listing the revisions was created for each community. From the tables, community-specific framework diagrams were created and returned to each community. A second level of analysis created a general framework which incorporated the domains, issues, and indicators common to all communities.

# C. Development of Community Health Framework & Indicators

Development of the comprehensive community health and wellness indicators framework began with reviewing each domain description and making any necessary revisions to ensure each one reflected the community definition of the domain. A set of indicator categories was then identified within each of the domains, and issues and indicators related to each area, as described by participants, were summarized. The next step was to search for existing data sources that would potentially be available at the community level. The components of the community health indicators framework are *domain, indicator categories, identified issues, community-proposed indicators* and *existing data sources*, as illustrated in Table 2, using Healthy Lifestyles (Self-Care) as an example.

Table 2
Community Health Indicators Framework – Components

Domain	Indicator Categories	Identified Issues	Community-proposed Indicators	Existing Data Sources
	outogones	Healthy eating		RHS Adult/Adolescent/Child Survey – Questions 59/29/50 Health Canada 2003 Nutrition Survey – Questions 21 & 22
		Healthy socializing		-
		Healthy self-image	girls saying no to sex	
Healthy Lifestyles	Self-care	Medical treatment	taking medication as prescribed	no indicator source (confidentiality issues)
			attendance at support groups	local survey of health and social agencies offering support groups
			# of medical appointments kept/missed	no indicator source (confidentiality issues)
			comfort with disclosing health issues	no indicator source
		Healthy home	keeping regular bedtime hours	no indicator source
			limiting TV/video game use	RHS Child/Adolescent Survey  – Questions 57& 69
		Hygiene		
	Participation	Social activities		
		Physical activities		
		Elders & youth		
		Programming		
	Motivation	Promotion		
		Environmental conditions		
		Affordability		
		Early engagement		
		Nutrition/fitness		
		awareness		

To create the toolkit for use at the community level, the information above was revised into a more user-friendly format and organized in a binder for easy reference. The web addresses of possible data sources were identified and referenced in the toolkit. Due to the fact that web addresses can change without notice, we have sometimes referenced the web source at the source level (i.e. Statistics Canada specific survey) rather than at the document level. A student from the Indian Communication Arts Program at First Nations University created a stylized community health and wellness indicators framework diagram, incorporating the appropriate colours and shapes identified by our partners and community participants (see Appendix J). An example of the user friendly format in the toolkit is provided in Appendix K, where Indicator # 27 from the Services and Infrastructure domain, Service Delivery indicator category is presented.

#### D. Pilot Testing the Framework & Indicators

The toolkit was piloted to test the framework design, format, and layout, and to assess the availability of indicator data at the community level. A pilot community was selected at the September 20, 2004 project meeting with community Health Directors. The choice of community was primarily based on the availability of indicator data from Statistics Canada for the community; due to in part to its size and its participation in recent surveys. A university research team member travelled to the community and worked with a community member to review the framework and the toolkit, and search for data on selected indicators. Additionally, in April 2005 the draft Community Health Indicators Framework was presented to the health director in the pilot community, community representatives, and representatives from the Athabasca Health Authority, for their review and comments. The experience of conducting the pilot and the feedback received from the pilot community was incorporated into the final revision of the tool kit. A second phase of the project, which would see the implementation of the toolkit in participating communities, is planned.

**APPENDICES** 

# Communities Participating in the First Nation's Health Development Project

**Northern Saskatchewan** 

#### MEMORANDUM OF AGREEMENT TO PARTICIPATE

**Project Title:** First Nation's Health Development:

**Tools for Program Planning and Evaluation** 

The purpose of this memorandum is to provide the terms under which each community agrees to participate in the above project. The memorandum outlines the assistance provided by the community contact person and the products the researchers will return to the community.

For the purposes of this project, the community contact will be the Health Director in each First Nation community and the local leadership (or designate) in the provincial communities in the Athabasca region.

**Primary Research Team:** Dr. Bonnie Jeffery, University of Regina

Dr. Sylvia Abonyi, University of Regina
Colleen Hamilton, Project Coordinator
Shawn Ahenakew, Project Assistant
Ernie Sauve, Prince Albert Grand Council
Anne Unsworth, Prince Albert Grand Council
Georgina MacDonald, Athabasca Health Authority
Lionel Bird, Northern Inter Tribal Health Authority

#### The community contact agrees to:

- Assist the researchers with setting up meetings to interview key informants in the community
- Assist the researchers with setting up focus groups with Health Committee members and with community members
- Assist the researchers in identifying a community member who will be hired and trained to conduct interviews and assist with focus groups in the community
- Provide advice to the researchers on the appropriate methods of involving their community in this project
- Participate in periodic research team meetings to review the deliverables developed throughout the project
- Review information specific to their community to ensure that it accurately reflects their program information

#### The researchers agree to:

- Provide a document reviewing the literature in the area of Aboriginal health and capacity building
- Hire and provide training for any community members who may be selected to assist with interviews and focus groups
- Provide community specific models of each program delivered in the community that relate to health
- Provide a copy of the deliverables for review and comments
- Provide a manual suggesting the types of information that could be collected to assist with program planning and evaluation
- Provide ongoing updates on the project work through access to a web-site Where accessing a web-site is difficult, a CD-ROM of all the information will be provided at regular intervals
- At all times, the researchers will maintain confidentiality of information gathered from individual interviews and community focus groups

This document describes the terms of reference for community agreement to participate in this project. Individual informed written consent will be obtained from those who agree to participate in the interviews and focus groups.

This memorandum will be reviewed periodically throughout the project to ensure that the project is being conducted in an appropriate manner in each community. Additional points may be added throughout the duration of the project.

What is a Logic Model?

#### What is a Logic Model?

- A tool used to describe and understand the overall structure and function of a program or service
- Describes how a program ideally should function, based on the program theory and goals
- Depicts relationships between the main activities or components of a program and its associated goals, objectives, outcomes and resources
- Can be used as a communication tool to describe a program or service to stakeholders, funders and program staff
- Can be used to assist in program planning and evaluation by:
  - illustrating the link between activities and outcomes
  - identifying differences between how the program should work and how it presently operates

Appendix F

**Generic Logic Models** 

# Addictions

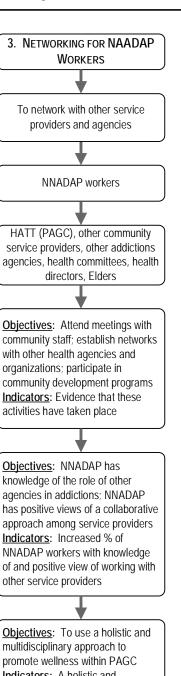

To support First Nations people and their communities in establishing operating programs aimed at arresting and offsetting high levels of alcohol, other drugs and substance abuse among the target population living on reserves.

#### Component 1. YOUTH ADDICTIONS To provide education and Goal prevention programs to youth in the community Target Youth and other community Group members NNADAP workers, health directors, Resources health committees, Elders, teachers Objectives: National Drug Awareness week in schools: prevention programming; health fairs; planning healthy community **Activities** activities for youth; AA meetings, camps, conferences. **Indicators**: Evidence that these activities have taken place **Objectives**: increased % of youth with positive views on healthy living. who practice responsible behavior, Short-term who have knowledge about effects of alcohol, drug and substance **Outcomes** abuse **Indicators**: Increased % of youth in above categories **Objectives**: Young people and other community members make responsible decisions regarding Long-term alcohol, drug and substance use **Outcomes** Indicators: Reduction in # of

community members with alcohol

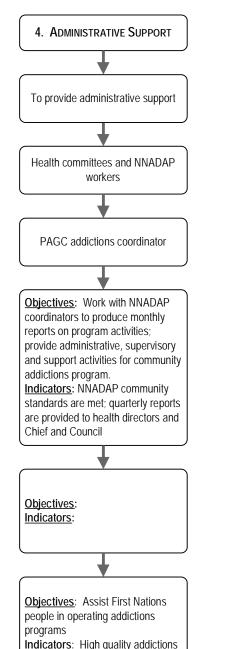

and drug problems

## 2. Addictions Intervention & Counselling To provide alcohol, drug and substance abuse intervention and counselling Community members Addictions and holistic health coordinators, mental health therapists, Elders, Brighter Futures, health directors, health committees Objectives: Referrals, counselling and interventions; develop networks of support; team approach; keep records and stats Indicators: AA meetings and roundups are occurring; youth and Elder retreats; stats are tracked Objectives: increased % of people with knowledge of effects of alcohol and substance abuse, with positive views on health living, with knowledge of counselling and support services **Indicators**: Increased % of people in above categories Objectives: Assist people to live healthier lives **Indicators**: Increased % of people living healthier lives

Objectives: NNADAP has knowledge of the role of other agencies in addictions: NNADAP has positive views of a collaborative approach among service providers Indicators: Increased % of NNADAP workers with knowledge of and positive view of working with other service providers

Objectives: To use a holistic and multidisciplinary approach to promote wellness within PAGC Indicators: A holistic and multidisciplinary approach is used

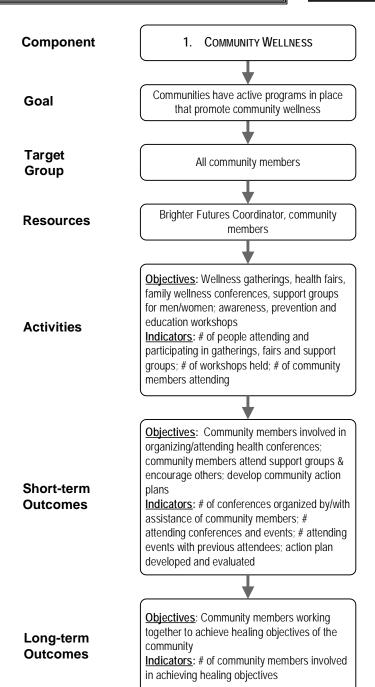

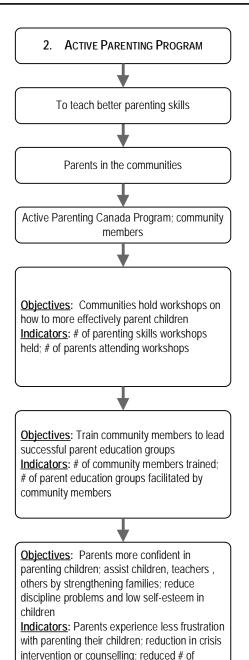

programs are in place

trained in the field of addictions

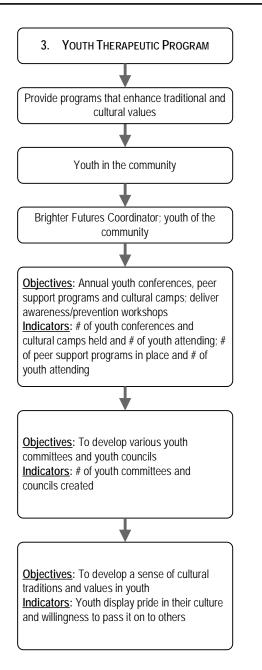

To manage the Brighter Futures, Building Health Communities and Family Violence initiatives contained within the community-based funding package. To ensure that program strategic elements include the restoration of traditional and cultural values, concept of healing, human resource development, provision of training and development of culturally appropriate prevention/postvention strategies, and to establish intervention resource capabilities.

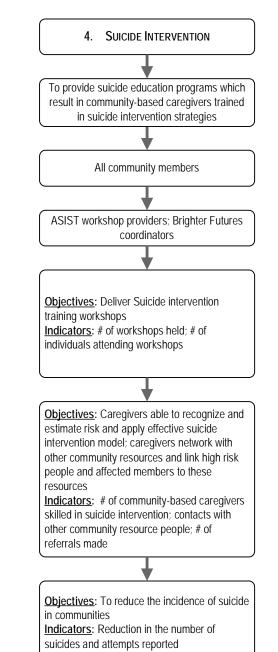

discipline incidences reported at school;

children display health self esteem

#### Component

#### 5. MENTAL HEALTH THERAPY

#### Goal

To provide consulting and professional services for mental health therapy

#### Target Group

Families and individuals in crisis; community members

#### Resources

Mental health counsellors; holistic health consultant; community members

#### **Activities**

<u>Objectives</u>: To deliver training in intervention strategies to community members (i.e. how to respond in a time of crisis)

<u>Indicators</u>: # of individuals attending crisis intervention training

# Short-term Outcomes

Objectives: Community members are supported in crisis situations; community members are able to apply crisis intervention strategies (i.e. debriefing, peer support) Indicators: # of community members who receive counselling and referral; # of incidents in which crisis intervention strategies are applied by community members

#### Long-term Outcomes

Objectives: To provide a response to crisis intervention in communities; mental health counsellor and holistic health consultants are supported by community members <a href="Indicators">Indicators</a>: Reduction in the number of suicides reported; # of times community members provided assistance

#### 6. SOLVENT ABUSE

To provide solvent abuse intervention and education strategies

#### All community members

Community intervention team; Brighter Futures Coordinator; teachers; community leaders

Objectives: Solvent abuse intervention/ prevention workshops; teacher training; promote networking & assist with referrals to external agencies; community education Indicators: # of workshops held; # of teachers trained; # of contacts/referrals with external agencies; # of community education events & # of community members attending

Objectives: Develop community-based solvent abuse team; develop community action plan; develop intervention strategies for youth Indicators: # of trained community-based teams in place; community action plan in place; # of youth intervention strategies developed

<u>Objectives</u>: To reduce incidence of solvent abuse by providing intervention, education and awareness

<u>Indicators</u>: Reduction in the number of reported solvent abuse incidents; community members decide not to abuse solvents; those who do are provided with interventions

#### 7. FAMILY VIOLENCE

To provide awareness, prevention, training and intervention strategies to address family violence

Individuals and families in crisis; community members

#### **Brighter Futures Coordinator**

Objectives: Provide coordination, workshops and training; deliver programs/services in communities that address violence issues Indicators: # of participants in workshops and training sessions; contacts between various programs and initiatives; # of programs and services being delivered in the communities

<u>Objectives</u>: Provide shelters and services for women and children in crisis; provide training to community workers in violence prevention and intervention

<u>Indicators</u>: # of women/children accessing emergency shelters/services; # of community workers trained in violence prevention

<u>Objectives</u>: To provide general awareness of violence issues to community members; to provide opportunities for research initiatives on violence in communities

<u>Indicators</u>: # of community members with less tolerance toward violence in their communities; # of research initiatives taking place; decreased # of family violence incidents

# CPNP - Canada Prenatal Nutrition Program

To provide maternal infant and nutritional health by providing a greater depth of service to women earlier in their pregnancy and for a longer duration postpartum.

#### Component

#### 1. NUTRITION EDUCATION

#### Goal

To improve nutritional health through greater depth of service during pregnancy and postpartum

#### Target Group

Pregnant and breastfeeding women, infants up to twelve months

#### Resources

Coordinator, health director, health committee, social/educational services team, health districts

#### Activities

Objectives: Provide nutrition education, counselling, and referrals; nutrition to clients; promote breastfeeding; CPNP community training Indicators: Increased community involvement; # of workshops/information on: breastfeeding, nutrition education and # attending; # of referrals made; increased # of breastfeeding mothers

# Short-term Outcomes

<u>Objectives</u>: Increase nutritional education among prenatal/breastfeeding women; increase awareness and education about FAS/FAE

<u>Indicators:</u> Increased # of prenatal and breastfeeding women who practice healthy nutrition; decrease in the # of prenatal and breastfeeding women who consume alcohol

#### Long-term Outcomes

<u>Objectives</u>: To improve the diet of prenatal and breastfeeding women in PAGC communities <u>Indicators</u>: Improved nutrition among prenatal women; decrease in # of babies with low birth weights, FAS/FAE or other health problems; decrease in # of infants with health or developmental problems

#### 2. COORDINATION

Coordinate CPNP and liaison between community, health committee, band, tribal council, MSB

CHNs, CHRs, health director/coordinators/ committees, NNADAP, pregnant/postnatal women and families

CHNs, CHRs, health director/coordinator/ committees, NNADAP, prenatal/postnatal women and families

Objectives: Develop and review community work plans and profiles; evaluation and accountability of program guidelines; review utilization of prenatal client profiles, pre/postnatal flow sheets, work plans Indicators: # of community work plans and profiles developed and reviewed; # of evaluations and client profiles, flow sheets and work plans reviewed; enhanced programs at community level

Objectives: Development of a standard community visit flow sheet to be utilized by coordinator <a href="Indicators">Indicators</a>: # of flow sheets developed and utilized by coordinator

<u>Objectives</u>: Support the development, implementation and evaluation of individual community-based CPNP work plans <u>Indicators</u>: # of community based work plans which are developed, implemented and evaluated

#### 3. EDUCATION AND NUTRITION SUPPORT

Support PAGC communities to initiate activities to meet educational and nutritional needs of health staff and community members

CHNs, CHRs, health director/coordinators, NNADAP, health committees, pregnant/postnatal women and families

CHNs, CHRs, health director/coordinator/ committees, NNADAP, pregnant/postnatal women and families

Objectives: Visits and review of CPNP; phone calls to health centre; assist in needs assessments as requested; quarterly mail out; provide training and conference information and briefing packages Indicators: # of visits, phone calls made; # needs assessments assisted on; # of information mail outs and briefing packages prepared

Objectives: Develop teaching tools and packages that support recommended nutritional intake and identified needs of members; streamline current and up to date information to communities Indicators: # of user friendly and culturally sensitive teaching resources available to health staff to facilitate workshops, activities and school programs

<u>Objectives</u>: Identify and address individual community needs; support coordination of community workshops and activities that support recommended nutrient intake and identified needs of members

<u>Indicators</u>: Community ownership, access and control through enhanced community-level CPNPs

#### 4. PRENATAL SUPPORT

Support PAGC communities to address holistic needs of childbearing women and families at risk

CHNs, CHRs, health director/coordinators/ committees, NNADAP, pregnant/postnatal mothers and families

Coordinator; health director/committee; health, social & educational team; health districts & services

<u>Objectives</u>: Assist in funding proposal submissions to enhance CPNPs; support and promote interagency linkages within First Nations to meet holistic needs of those at risk **Indicators**: Increased # of proposals submitted and

<u>Indicators</u>: Increased # of proposals submitted and additional funding received; Increased # of linkages with First Nations

Objectives: Support enhanced community-based CPNP work plan to include: implications of teenage pregnancy and parenting, FAS initiatives, gestational diabetes awareness and prevention, HIV/AIDS counselling for all prenatal women Indicators: Increased # of above activities taking place

Objectives: Enhance CPNPs through interagency communication, developing a sense of community ownership, increasing community member participation, youth resilience strategies Indicators: Increased capacity of community CPNPs; positive lifestyles; healthy birth weights; decreased FAS, gestational diabetes, and HIV/AIDs; decreased infant mortality and teenage pregnancy

To provide quality community daycare which provides a healthy, safe environment; that promotes cultural and traditional teachings; which meets children's long and short term physical, emotional, cognitive and spiritual developments and needs.

#### Component

#### 1. CAREGIVER QUALIFICATIONS

Goal

To provide quality childcare by trained caregivers who are child centered and supportive of families, their values and needs

**Target** Group

Daycare workers, trainers, parents and children

Resources

Daycare coordinators; daycare workers

#### **Activities**

Objectives: Workers have experience & postsecondary accreditation; provide a positive emotional environment; train practicum students; maximize strengths and interests of staff; recognize that fair and equitable salaries reduces staff turnover and ensures quality care **Indicators**: # of workers with childcare education: # who report a positive emotional environment; # of practicum students accepted; length of time staff stay in positions; salary grid

Objectives: Clear job descriptions and regular performance appraisals; develop code of ethics

Indicators: # of job descriptions; # of performance appraisals completed; caregivers apply code of ethics in their daily work

Long-term **Outcomes**  Objectives: Workers are competent and committed; have early childhood professional training or experience; caregivers maintain a commitment to continued education **Indicators**: Increased # of daycare workers with formal training or demonstrated competency through experience; increased # of caregivers who continue their education

#### 2. CHILD DEVELOPMENT

To provide for continuous opportunities for learning and nurturance

Children in care; parents

Daycare coordinators; daycare workers

Objectives: Plan and facilitate meaningful experiences based on child development theory; share information with parents; foster knowledge of other cultures **Indicators**: # of planned activities based on child development theory; # of regular meetings held with parents; # of activities that

involve customs of other cultures

**Objectives:** Develop framework of routines which support the physical, social, intellectual and emotional needs of children; daycare practices show reference to sound child development theories and current research **Indicators**: # of monthly activity reports which support the physical, social, intellectual and emotional needs of children: increased # of practices show reference to sound child development theories and current research

**Objectives:** Services offered are determined by needs of the children and shared philosophies of parents and care providers Indicators: # of services offered which have been developed with input from parents and care providers

#### 3. CHILD STAFF RATIO AND GROUP SIZE

To maintain a small group size and adult to child ratio that contributes to the quality of interaction among children and care providers

Children in daycare

Daycare coordinators; daycare workers

Objectives: Modify adult to child ratio to meet children's ages and special needs; maintain adult to child ratio during occasional special group activities; recognize frequent interaction necessary to secure attachments for infants and toddlers

Indicators: # of adult to child ratios modified to ages and special needs of children; # of large group activities taking place with adult to child rations maintained; # contacts individual infants and toddlers receive from workers

Objectives: To interact frequently with the children through daily activities in small groups **Indicators**: # and frequency of interactions with the children in small groups

**Objectives:** To work in small groups to foster the development of independence, cooperation and mutual respect in children **Indicators**: Adult/child ratios and group sizes

meet accredited standards; increased occurence of children behaving in an independent, cooperative, respectful manner

#### 4. HEALTH AND NUTRITION

To deliver quality child care that practices sound health principles and promotes these among children, families and care providers

Children in daycare; community members; parents

Daycare coordinators; daycare workers

Objectives: Meet children's nutritional requirements; exclude children/workers with communicable diseases: maintain health records of children/workers; parental authorization for administration of medications; feeding schedules meet infant/toddler needs Indicators: # of: meals/snacks provided that meet Canada Food Guide & are culturally appropriate; exclusions of children/workers; reduction in # of diseases children exposed to in facility; up to date health records; documented authorizations: feeding schedules

**Objectives**: Establish and adhere to procedures regarding: food preparation, general cleaning, sanitation, etc.; share information on health practices/resources Indicators: # of procedures established; # of procedures being followed; increased # and type of health information given to parents

Objectives: Workers model use of sound health practices & conduct activities in positive, tension-free manner; attend to children's physical and emotional needs Indicators: # of children and workers who report positive environment; reduced # of

children in need of physical & emotional care

#### 5. SAFETY Component To provide for the safety of each child and to Goal promote safe practices among children, families and care providers **Target** Children in daycare; parents; community members Group Daycare coordinators; daycare workers; Resources external health/safety agencies **Objectives**: Workers competent in safety equipment use & trained in practice of First Aid /CPR; condition of facilities, equipment, toys regularly examined; safety information shared with children/parents; list of emergency phone **Activities** numbers maintained **Indicators**: # of workers trained in use of safety equipment, First Aid/CPR; # of equipment examination reports; # of contacts with children/parents re: safety information; # and type of phone numbers on emergency list **Objectives**: Emergency procedures established, posted and practiced by care providers and children; daycare facility is Short-term sanitary and free of hazards **Indicators**: Increased % of emergency **Outcomes** situations where proper procedures were followed; reduction in # of potential hazards and problems associated with sanitation **Objectives**: Daycare workers aware of and Long-term prepared for potentially hazardous situations **Outcomes Indicators**: Increased % of workers who are

prepared for potentially hazardous situations

# 6. FAMILY/CAREGIVER RELATIONSHIP To maintain an open, friendly and informative relationship with each child's family and to encourage their involvement Daycare worker; parents; children Daycare coordinators; daycare workers Objectives: Orient new families; communicate

Objectives: Orient new families; communicate with other involved agencies; develop common goals with parents and work as team; respect and recognize families' backgrounds; observe strict confidentiality; provide privacy to parents Indicators: # of: orientations held/ attended; communications with other agencies; contacts with parents to plan activities; families from other backgrounds treated respectfully; confidentiality guidelines in place & followed; meetings with parents held in private

<u>Objectives</u>: Support parents' desires to be involved in programs and provide opportunities for regular family involvement; provide for a parent resource component <u>Indicators</u>: # of opportunities for family involvement; # of parent resources available at daycare facility

Objectives: Interactions reflect mutual respect, trust and cooperation; parents kept informed of child's progress and experiences Indicators: Increased % of interactions which reflect mutual respect, trust and cooperation; # and type of contacts made with parents

To assist on-reserve First Nations people in achieving optimal dental health.

# Component

#### 1. Prevention

To reduce the rate of dental disease through a prevention program

#### Target Group

Goal

School-aged children; other community members

#### Resources

Dental therapist; community health staff, teachers

#### Activities

Objectives: Provide educational/promotional information & materials; nutritional counselling; school fluoride & daily brush programs; preschool duraflur program; oral hygiene instruction; perform prophy, sealants, scaling, fluoride, mouth guard, denture care Indicators: # of materials distributed; # nutritional & oral hygiene sessions held, # attending; # children in fluoride, duraflur & daily brush programs; # of services performed

# Short-term Outcomes

<u>Objectives</u>: Provide childhood caries awareness, prevention and treatment; provide oral health awareness

Indicators: # of people aware of prevention and treatment of childhood caries; decrease in % of childhood caries; # of people who practice good oral health; decrease in % of people with dental diseases

#### Long-term Outcomes

Objectives: Increase good oral health practices by community members Indicators: Increased % of community members with good oral health practices; decrease in def/dmf for 6 and 12 year olds and in # of children receiving G.A. for caries

#### 2. TREATMENT

To provide quality restorative treatment services

Pre-school and school-aged children; other community members

Dental therapist; community health staff, teachers

Objectives: Provide school fluoride & preschool duraflur programs; provide quality restorative treatments; provide referrals; provide treatment information to patients Indicators: # of children receiveing fluoride & duraflur treatments; # of restorative treatments performed; # of referrals made, completed and followed-up; % of visits that include treatment information

Objectives: Provide preventative and emergency treatment to preschoolers; provide school-based program to children with consents; provide adult emergency services <a href="Indicators">Indicators</a>: # of preschool and school-aged children treated & needs met; # of adult emergency services performed and needs met; # of treatment plans completed

<u>Objectives</u>: Maintain and improve the dental health of community members

Indicators: Increased % of community members with good dental health & who retain dentition; decrease in def/dmf of 6 and 12 year olds

#### 3. DENTAL THERAPIST SUPPORT

To provide ongoing education and support to dental therapists

Dental therapists

Senior Dental Therapist, dentists

<u>Objectives</u>: Provide updated manuals, regulations, standardized equipment/supplies; provide in-service education; do program evaluations, review reports & records; share information; assist in problem solving; provide access to a DDS

<u>Indicators</u>: % of therapists with current manuals, regulations & standardized equipment/supplies; # with current education; # in-services provided, # attending; # evaluations/reviews conducted; # contacts made; # with access to DDS

Objectives: Provide therapists with continuing education, support, and orientation packages Indicators: # of educational opportunities, # attending; # therapists up-to-date on current knowledge and trends; # of support activities; # of therapists given orientation packages

Objectives: Therapists maintain licensing standards; have understanding of their role; provide high quality dental services Indicators: % of therapists who meet current licensing standards; % of therapists who provide high quality dental services; % of therapists with understanding of their role

#### 4. COMMUNICATION AND RECRUITMENT

To increase program awareness and development

Health, educational and governmental organizations

Senior dental therapist, community health manager, dental therapists, health organizations

Objectives: Recruitment packages to SIFC School of Dental Therapy; provide recruitment strategy; screen for competent, qualified candidates; capital request input; review salary/benefits, lobby for additional resources Indicators: # of recruitment packages to SIFC; recruitment strategy & activities; # applications screened and filled by qualified, competent candidates; # of capital requests; # of lobby contacts; # additional resources received

Objectives: Liaise with health agencies; maintain pool of qualified candidates; provide salaries/ benefits equitable to other agencies

Indicators: # of contacts made with agencies; # qualified applicants for posted positions; salary/ benefit package comparable to other agencies

<u>Objectives</u>: Maintain relationships with related health agencies; hire qualified dental therapists; standardize and replace outdated equipment <u>Indicators</u>: # of contacts with related health agencies; quality dental care provided in a culturally sensitive manner by competent and qualified therapists; equipment standardized

# Diabetes

#### Component

#### 1. Prevention Education

Primary prevention of type 2 diabetes through sustainable community based education initiatives

Target Group

Goal

Community members, community health workers

Resources

**Activities** 

Community diabetes nurse educator, Northern Diabetes Prevention Coalition, nutritionists, CHRs, CHNs, health directors, health districts, media

Objectives: Assist NDPC in media awareness, resource gathering, pilot projects; provide information on walking programs; school and public health fairs/forums on chronic disease prevention; meet to develop proposals for healthy food policies in North

<u>Indicators</u>: # of media campaigns, resources gathered, pilot projects by NDPC; # information sessions, fairs/forums held and # attending; # northern food proposals developed

Short-term Outcomes <u>Objectives</u>: Build awareness of diabetes prevention and encourage physical activity; assist development of strategies for implementation of healthy public policies

<u>Indicators</u>: Increased % of individuals aware of diabetes prevention; # of physical activities avail. in communities; # of strategies developed

Long-term Outcomes <u>Objectives</u>: Increase awareness of Type 2 diabetes prevention; increase awareness of benefits of community action on health lifestyles (nutrition, physical activity)

<u>Indicators</u>: Increased % of people who are: aware of prevention factors; who are physically active; who eat nutritious food; decrease in # of new cases

#### 2. CAPACITY BUILDING

Primary prevention of type 2 diabetes through sustainable community-based capacity building initiatives

Community members, community health workers, teachers, principles, health directors

Community diabetes nurse educator, community health nurses, nutritionists, health directors

<u>Objectives</u>: Notify communities of available grants; provide resources to health committees; classroom presentations, cooking classes in schools; develop and obtain teacher resources; speak at teachers conference

<u>Indicators</u>: # of grants applied for; # of resources provided to committees; # of in school presentations and cooking classes offered; # of resources available to teachers; # of conference presentations

<u>Objectives</u>: Assist northern communities to secure funding for prevention programs; teacher education; encourage healthy eating and lifestyles

<u>Indicators</u>: # of prevention programs funded; # of teacher education activities held; # of activities promoting healthy eating and lifestyle held

<u>Objectives</u>: Support the development of community specific strategies to increase physical activity and healthier lifestyle practices <u>Indicators</u>: Increase in # of community strategies; increased % of people physically active and practicing healthy lifestyles; decrease in # of new type 2 diabetes cases diagnosed

#### 3. LIFESTYLE SUPPORT

To provide lifestyle support to individuals/families with diabetes through sustainable community-based action

Community members and health staff

CHNs, CHRs, home care workers

<u>Objectives</u>: Diabetes workshops, small group/ individual counselling; monthly visits to communities home visits; staff in-services

Indicators: # of diabetes workshops, small group and individual counselling sessions held and # of affected individuals attending; # of visits to communities; # of home visits made; # of staff inservices delivered

<u>Objectives</u>: Educate those affected by diabetes to monitor and manage diabetes; encourage self care and management; educate and act as a resource to health staff

<u>Indicators</u>: Increased knowledge/skills in diabetes care and prevention for community health care workers; # of education activities for people affected by diabetes; increase in # of people with diabetes who show correct skills in managing their disease

<u>Objectives</u>: Provide support services to individuals and their families to adapt to life with type 2 diabetes <u>Indicators</u>: Increased % of people who use support services to adapt to life with diabetes; improvement in the quality of life for those with diabetes

#### 4. SECONDARY AND TERTIARY SUPPORT

To provide secondary and tertiary prevention in diabetes that are sustainable and community based

Community members, health directors, community health care workers, other health agencies

Health directors, community members, NDPC

Objectives: Encourage projects on healthy eating/activity; provide on the job training; assist with telehealth conferences; meet with nurses re: resources; offer resources to other organizations, meet to collaborate and share information <a href="Indicators">Indicators</a>: # of community projects carried out; # of training sessions held; conferences assisted with; # of meetings with nurses and resources shared with other organizations

<u>Objectives:</u> Assist northern communities to secure NDPC funding; educate new diabetes workers; be a resource to other agencies, offer culturally appropriate resources; represent communities to obtain info and share resources

<u>Indicators:</u> # of projects funded; # educated new diabetes workers; #of contacts with other agencies and # of culturally appropriate resources provided

<u>Objectives</u>: Encourage new/existing health services to be accessible, culturally appropriate and better able to provide specialized diabetic health services <u>Indicators</u>: Other agencies involved in health care (hospitals and diabetes teams) are using culturally appropriate resources; specialized diabetic health services are accessible

Disease prevention through the maintenance of a safe and healthful human environment.

#### Component

#### 1. WATER, SEWAGE AND SOLID WASTE

Goal

To inspect and monitor community and private water supplies to ensure proper construction and operation; inspect private and community sewage and solid waste disposal systems

#### Target Group

Elected leaders, community members and health staff

#### Resources

EHOs, water quality technician

#### Activities

Objectives: Monitor water sampling programs; take sewage effluent samples and report results; ensure compliance with legislation and recommend improvements <a href="Indicators">Indicators</a>: # of monitoring reports; # of samples taken and results reported; % of regulations complied with; # of recommendations for improvements

# Short-term Outcomes

Objectives: To increase # of community members with safe water and satisfactory systems; reduce communicable diseases Indicators: # of community members with safe and satisfactory water and sewage systems; decrease in # of communicable diseases

#### Long-term Outcomes

<u>Objectives</u>: To ensure safe drinking water; to ensure disposal systems meet safe design and operational standards

<u>Indicators</u>: % of homes with safe drinking water; # of homes with sewage systems that meet design and operational standards

#### 2. Housing Inspection

Inspection of houses and housing developments for health considerations

Elected leaders, community members and health staff

#### **EHOs**

Objectives: Inspect houses to identify health hazards; advise on necessary corrective action; recommend and approve installation of sewage and water systems for CMHC funded houses; advise on handicap needs Indicators: Age of housing stock; # of residents housed (occupancy standards); # of houses meeting guidelines and standards; long term planning mechanism; # of housing inspections

<u>Objectives</u>: To increase % of community members who have knowledge about the corrective action necessary to correct housing deficiencies

<u>Indicators</u>: # of community members who are aware of and support corrective action

<u>Objectives</u>: To ensure that First Nations people living on reserves have adequate and safe housing

<u>Indicators</u>: Safe housing is available to all community members

## 3. COMMUNICABLE DISEASE OUTBREAK INVESTIGATION

To investigate communicable disease outbreaks related to environmental health conditions

Elected leaders, community members and health staff

EHOs, water quality technician

Objectives: Identify contacts, source, mode of transmission, control/action; inspect food establishments and water supplies; insect and pest inspection/control; monitor bacteriological water sampling; coordinate investigations Indicators: # of outbreak sources etc. identified; # of inspections; rate of food water borne diseases; # of meetings with community people; # of "endemic" communities

Objectives: Increased % of people with knowledge of water, food and vector borne diseases; increased # of people who practice sound environmental health behaviour regarding communicable disease control Indicators: Increase in % of community members who have knowledge about water, food and vector borne diseases and who practice sound environmental health behavior in regard to communicable disease control

<u>Objectives</u>: To decrease communicable disease outbreaks related to environmental health conditions

<u>Indicators</u>: Decreased incidence of communicable disease outbreaks

#### 4. ENVIRONMENTAL EMERGENCY

To respond to emergency situations

Elected leaders, community members and health staff

Emergency response plan, Environmental Health Officer

<u>Objectives</u>: Identify a crisis and work closely with Chief and Council in emergency situations; keep community members informed; have a safe environment for people if evacuation is necessary

<u>Indicators</u>: # of contacts with Chief and Council and community members during a crisis; # of evacuations to safe alternative environments

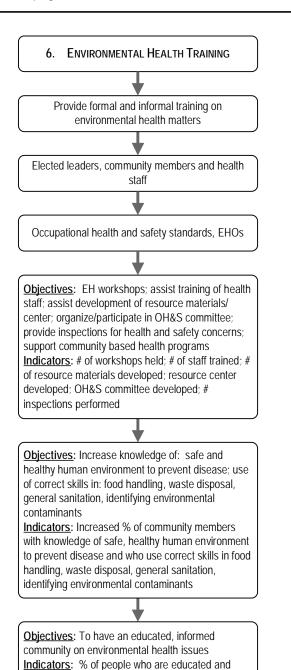

<u>Objectives</u>: Increase knowledge and cooperation with community members during an emergency situation

<u>Indicators</u>: Increased knowledge and cooperation by community members during an emergency situation

<u>Objectives</u>: To respond effectively during an emergency situation

<u>Indicators</u>: # of emergency situations that are responded to in an effective and coordinated manner

#### 5. OCCUPATIONAL HEALTH Component Investigate and identify occupational health hazards Goal in community-operated worksites **Target** Elected leaders, community members and health staff Group WHMIS, occupational health and safety standards, Resources **EHOs Objectives:** Develop Occupational Health and Safety program; develop and conduct WHMIS, health/safety legislation education sessions; advise on action necessary to ensure safe, healthy **Activities** worksite; inspect recreational facilities **Indicators:** # of inspections done; rate of illness and injury; facilities meet standards; # of meetings with leadership and individuals regarding safe work environment; # of training sessions held **Objectives:** To increase awareness and knowledge of health and safety legislation among employers and employees; to increase # of healthy and safe Short-term worksites **Outcomes Indicators**: Increased awareness and knowledge of health and safety legislation among employers and employees; increased # of healthy and safe worksites Objectives: To ensure healthy and safe working conditions are provided & maintained Long-term **Indicators**: Worksites are healthy and safe; **Outcomes** decrease in absenteeism due to injury and illness from unhealthy, unsafe worksites

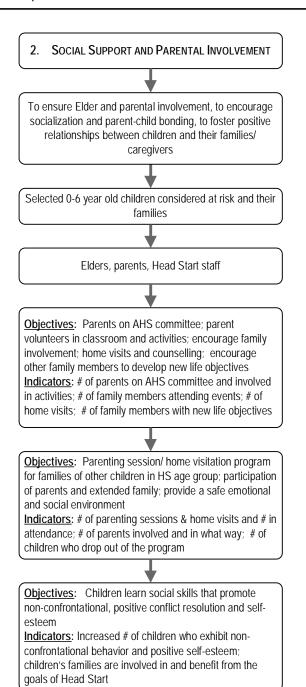

informed regarding Environmental Health

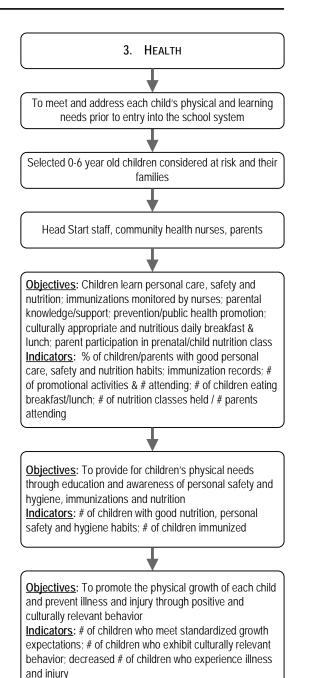

To foster community and family healing, by mobilizing community and regional resources, to provide children with the programs and resources they need to develop a healthy body, mind, emotion and spirit.

#### Component 1. Culture and Language To increase the accessibility to cultural and linguistic Goal programs for children and their families **Target** Selected 0-6 year old children considered at risk and their families Group Elders, parents, Head Start Staff Resources Objectives: traditional outdoor activities (i.e. camping, gathering, fishing); instruction primarily in Aboriginal language; sharing of family stories, meals and community events; Elders' guidance of daily programming and **Activities** program governance **Indicators**: # and frequency of traditional/cultural activities taking place; % of lessons in Aboriginal language; % of program planned with Elders Objectives: Under the guidance of Elders, develop daily activities for children and parents emphasizing the traditional lifestyle of the Aboriginal people Short-term **Indicators:** # of elders involved in the program; type of **Outcomes** activities in which Elders are involved, and level of involvement (nominal, decision making, etc.); # of parents participating in activities <u>Objectives</u>: Children immersed in their respective culture and tradition at an early age; spoken and written Aboriginal language is primary way of communicating Long-term **Indicators**: Increased # of young children with an **Outcomes** awareness of and pride in their Aboriginal culture; # of activities and situations where Aboriginal language is the

primary language in use

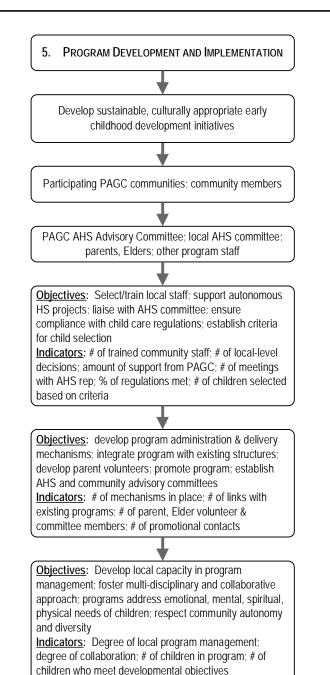

#### Component 4. EDUCATION To provide children with a head start in academic and Goal cultural learning in order to facilitate the transition into the education and social environment Selected 0-6 year old children considered at risk and their **Target** Group families Resources Elders, parents, Head Start staff **Objectives:** Activities designed to improve physical and cognitive skills; activities will revolve around traditional Aboriginal lifestyles **Indicators**: # of activities taking place that develop **Activities** physical skills; # of activities taking place that develop cognitive skills; # of activities which revolve around traditional lifestyles Short-term Objectives: **Outcomes** Indicators: **Objectives:** To encourage the child's life-long learning by promoting physical, spiritual, emotional, intellectual and social development; to develop each child's identity Long-term through experiences in the program Outcomes **Indicators**: # of children with a positive sense of identity;

# of children who stay in school; children are prepared

and confident when entering the school system

#### Component

#### 1. HEALTH EDUCATION AND PROMOTION

#### Goal

To provide consultation to communities on health promotion and health strategies

#### Target Group

Health committees, health directors, community health staff, community leaders and members

#### Resources

Health Promotion, health directors, staff, communities; PAGC nursing and Community Services Team; community leadership, members; other tribal councils

#### **Activities**

Objectives: Attend health committee meetings; review community needs assessment with health staff, leaders and First Nations members; assess readiness, resources, time frames for healthy changes; plan promotion/education programming: set objectives take a resource inventor, do action plan; implement activities; evaluate, revise and follow up community programs

Indicators: Appropriate health promotion and education methodologies were applied

# Short-term Outcomes

Objectives: Assist First Nations staff, health committees to identify Health Promotion priorities for each community Indicators: Community participates in defining Health Promotion needs, communities have identified main Health Promotion and education priorities

#### Long-term Outcomes

<u>Objectives</u>: Assist First Nations communities to plan, implement and evaluate health promotion/education programs

Indicators: Health Promotion and education programs are implemented/evaluated from community feedback

#### 2. HEALTH EDUCATION TRAINING

Provide specialized training for delivery of Health Promotion

Health directors, committees, health staff, leaders and members

Health directors, staff, leadership; PAGC Nursing, Health Team; MSB; other tribal councils

Objectives: Implement "facilitator training" workshops; delivery of Health Promotion and education activities; provide literature and teaching packages to community health workers; health education workshops; workshops targeted at children and youth

<u>Indicators</u>: Health Promotion and education activities implemented; health education methodologies were applied; appropriate education materials provided

<u>Objectives</u>: Increase % of community health staff who have knowledge and positive views about the importance of education and prevention; Increase availability and use of culturally appropriate resources

<u>Indicators</u>: Increased % of community staff who have knowledge of education and prevention; increase in the use of culturally appropriate resources

<u>Objectives</u>: Assist community health staff to deliver culturally appropriate health education programs <u>Indicators</u>: Culturally appropriate health education programs are delivered by community health staff

#### 3. HEALTH EDUCATION PROMOTION

To distribute and develop health education and promotion materials

Community nurses, CHRs, home care workers, health directors, committee members, teachers and other interested residents

Health Promotion Working Group, MSB, PAGC Health and Social Development Staff, community leadership, health directors, Health Promotions, other tribal councils

Objectives: Develop monthly activity themes; collect develop and distribute health education posters, pamphlets and videos for promotion activities; review literature and materials; assist communities to access available funding sources for health promotion activities

<u>Indicators</u>: Education and promotion materials provided; monthly Health Promotion theme developed and materials distributed; access to funding sources for health promotion activities

<u>Objectives</u>: Increase % of people who have knowledge about health education and promotion; increase available funding for resources and activities

<u>Indicators</u>: Increased % of people who have knowledge about health education and promotion materials; Funding made available for education and promotion resources and activities

<u>Objectives</u>: To have a centralized area for resource materials that is accessible to communities and health providers

Indicators: Resource centre has been established

## 4. TECHNICAL ADVICE AND PROGRAM DEVELOPMENT

To develop and implement a comprehensive health education and promotion strategy for PAGC band members

CHR s

Health Promotions, health directors, PAGC administration, other tribal councils

Objectives: Provide consulting services to CHR s; act as CHR advisor regarding training programs, conferences, Saskatchewan CHR association; coordinate annual CHR conference; assist CHR s in implementing health education activities; assist health directors in job performance evaluations <a href="Indicators">Indicators</a>: CHR s concerns and questions are addressed; CHR s implementing health education activities

Objectives: To increase % of CHR s who demonstrate correct skills in delivering health education activities <a href="Indicators">Indicators</a>: Increased % of CHR s who demonstrate confidence and correct skills in delivering health education activities

Objectives: To assist in professional development of CHR s

<u>Indicators</u>: CHR s are better equipped to do their jobs through increased job training and support

To review research and develop holistic health programs for the First Nations of PAGC and to provide ongoing advice and consultation services to First Nations.

#### Component

#### Goal

#### **Target** Group

#### Resources

#### **Activities**

#### Short-term **Outcomes**

#### Long-term **Outcomes**

Objectives: Mental health services are available to meet community needs Indicators: # of mental health services available and # of people accessing them

#### 1. Mental Health Program DEVELOPMENT

To support & assist in the development of a comprehensive mental health program

Health service providers

Holistic Health coordinator, mental health therapists, Brighter Futures, NNADAP, health directors/committees, Elders

Objectives: Request crisis intervention; Assist in contract development; support community therapists; contract mental health therapists; community statistics **Indicators**: Community crisis intervention provided; therapist support provided; community stats provided; mental health support provided; communities assisted in recruitment and provision of mental health services

Objectives: To increase: knowledge of mental health role in overall health: positive views on use of mental health services; good mental health behaviours; understanding of mental health needs **Indicators**: Increased % of people with: knowledge of mental health (m.h.) role in health; positive views on use of m.h. services; who practice good m.h. behavior & understand m.h. needs

> Objectives: To enhance expertise and competency within service delivery staff **Indicators:** Service providers have the expertise needed to do their job

#### 2. TRAINING AND PROFESSIONAL DEVELOPMENT

Capacity-building through training and workshops

Service delivery staff

Holistic Health coordinator, mental health therapists, Brighter Futures, Elders

**Objectives**: Provide training opportunities (e.g. professional assault response training PART); provide workshops (e.g. team development, conflict resolution) **Indicators**: # of training opportunities and workshops held and # of staff attending

Objectives: Increase service providers who demonstrate correct skills in: individual counselling, group presentations; increase service providers with knowledge about community crisis response

**Indicators**: Increased % of service providers demonstrating correct skills in individual counselling and group presentations; increased % of service providers who demonstrate correct skills in crisis response

#### 3. PROGRAM STRATEGY, DELIVERY AND FUNDING

To research strategies, program delivery options and funding opportunities and communicate these to communities

HSDWG, health directors, health committees

Objectives: Research health models, programs & methods; provide research to First Nations and assist to identify most effective programs and approaches; write proposals; network with other agencies to gather information and strategies in use Indicators: Tasks are ongoing; Manitoba First Nations health and social delivery and BTC-urban services have been researched

**Objectives**: Service providers demonstrate correct skills in: individual counselling, group presentations; service providers have knowledge about community crisis response Indicators: Increased % of service providers who demonstrate correct skills in individual counselling, group presentations, and crisis response

Objectives: To enhance expertise and competency in service delivery staff **Indicators**: Service providers have the expertise needed to do their job

#### 4. HEALTH AND SOCIAL SERVICE **N**ETWORKING

Networking with PAGC Health and Social Development programs and other community agencies

PAGC Health and Social Development staff, community agencies

PAGC Health and Social Development health directors, health committees, Elders, community agencies

**Objectives:** Assist in Community Service Team meetings; develop service delivery process: work collaboratively with community agencies; participate in PAGC interagency development **Indicators**: CST formed and meetings held: # contacts with agencies

Objectives: Increase knowledge of services offered by different programs; increase positive views about working together; increase positive team building and working behaviour **Indicators**: Increased % of people who have knowledge of services offered; who

have positive views about working together and positive team building/ working behaviour

**Objectives:** PAGC Health and Social Development programs compliment each other: First Nation communities receive comprehensive 2nd level services Indicators: Improved services to First Nations communities

#### 5. RESIDENTIAL SCHOOL PLAN **HEALING DEVELOPMENT**

To help communities identify what they need for healing and support them in identifying a plan for healing

Survivors of residential schools

Health directors, health committees, Elders

**Objectives:** Interview survivors; assist to identify healing needs; support survivors to identify healing plan; assist with funding proposals, proposal writing workshop (AHF process); assist in community final reports; provide follow up **Indicators**: Residential School working groups (survivors) established in some communities; # of proposal writing workshops held

Objectives: Increase knowledge of residential school role in overall health of individuals and communities: increase funding proposal writing skills **Indicators**: Increased % of people with knowledge of residential school role in health; increased % of people with the skills to write funding proposals

**Objectives**: Residential school survivors understand effects of that experience and support each other in healing **Indicators**: Support groups and programs in place for people affected by the residential school experience

# Home and Community Care

To provide basic home and community care services that are comprehensive, accessible, effective and equitable to that of other home care services, and which are delivered in a culturally sensitive manner responsive to the unique needs of each community.

#### Component

#### PROGRAM MANAGEMENT AND **SUPERVISION**

To mange home and community care program delivered in communities and provide supervision to the home health aide

#### **Target** Group

Goal

Clients identified as needing home care services; home care nurses; home health aides; ; community members

#### Resources

Home care nurse; home health aide; health portfolio counsellor; assistant nursing supervisor, home care consultant

#### **Activities**

Objectives: Home health aide supervised and trained by home care nurse; staff attend monthly meetings; health committee/health portfolio counsellor administer overall program; PAGC supervise/support comm. nursing staff Indicators: # of contacts between home care nurse and home health aide; # of meetings and # attending; # of identified & clear lines of reporting and communication; PAGC contacts

#### Short-term **Outcomes**

Objectives: Home health aides are trained and competent

Indicators: % of home health aides who have received certified training or certification

#### Long-term **Outcomes**

Objectives: Services provided in consistent, fair, timely manner; home care staff supported; staff are clinically competent and culturally sensitive; services meet program standards **Indicators**: % of services provided timely manner; clients are prioritized; # of staff/ supervisor contacts & training opportunities; # of caregivers competent and culturally sensitive; program standards are met

#### 2. CASE MANAGEMENT

To develop a client-centered care plan based on assessed need and to coordinate the multiple services a client may be receiving

Clients who have been assessed as requiring and/or whom are receiving home and community care services

Home care nurses, home health aides, other service providers within and outside the community

Objectives: Assess & review client needs; provide referrals to other services; facilitate communication with other care providers; develop admission and discharge plans; maintain client's home care chart **Indicators**: # of client files containing care plans and reassessments; # of referrals and communications with other care providers

#### Objectives: Indicators:

Objectives: To prepare and maximize the ability of the individual to remain independent at home by offering integrated services that provide needed care and support **Indicators**: % of community members who are able to remain independently at home with the support of integrated home care services

#### 3. CLIENT ASSESSMENT

To provide immediate and ongoing assessment of client needs

Community members who have been assessed as requiring home care services

Home care nurse; home health aides

Objectives: Initial assessment of condition and circumstances done in client's home; identify needs and determine how needs currently being met; develop client-centered care plan; perform annual reassessment Indicators: # of initial care plans, care plan reassessments and referrals recorded in client's

**Objectives:** Client-centered care plans are developed, implemented and modified as required

Indicators: # of client files which contain record of care plans being followed

**Objectives:** Home and community care services are delivered based on individual health needs (physical, mental, emotional and spiritual)

**Indicators**: % of needs identified in care plans being met as per client file records; comprehensive care plans are developed which meet the client's needs

#### 4. Home Care Nursing

To provide safe, clinically competent and culturally sensitive home care nursing and education to the community

Community members requiring services; home care nurse

Home care nurse; home health aides

Objectives: Nursing care performed in client's home: teach clients self-care skills: facilitate wellness/healthy lifestyle clinics and education: staff attend annual nursing conference Indicators: # and type of services provided recorded in clients charts; # attending wellness clinics and receiving information; home care nurse attends annual conference

**Objectives**: Home care nurse is competent in identified basic skills; community members educated on home care and family role **Indicators**: # of basic skills home care nurse trained in; # of people who understand home care services and family role

**Objectives**: Nursing staff update and expand skills; family members assist in care; healthy lifestyles chosen by community members **Indicators**: # of professional education opportunities attended; # of clients with appropriate family support; increased % of community members with health lifestyles; clients provided with appropriate care by competent staff

# Home and Community Care

#### Component

#### 5. HOME SUPPORT - PERSONAL CARE AND HOME MANAGEMENT

#### Goal

To provide personal care and home management services and education

#### **Target** Group

Community members who have been assessed as requiring home care services

#### Resources

Home health aides; personal care workers

#### **Activities**

Objectives: Personal care services - assist with daily living activities (bathing, dressing, mobility, etc.); home management services assist with light housekeeping, meal preparation, arrange for home maintenance, etc.; teach clients personal care and home management strategies

**Indicators**: # of personal care and home management services performed as recorded in client file; increased # of tasks that clients can complete themselves

#### Short-term **Outcomes**

Objectives: Clients have their basic personal care and home management needs provided **Indicators:** % of clients with basic personal care and home management needs provided and whose homes and personal care levels meet acceptable norms

#### Long-term **Outcomes**

**Objectives:** Clients personal, nutritional and household needs are maintained in a manner that contributes to the maintenance and improvement of health

Indicators: % of clients whose homes, personal care and nutritional standards meet identified norms: client health is maintained and/or improved as a result

#### 6. In-home Respite

To provide for the care of a client for a short time to support the caregiver

High needs clients who are cared for in the home by a family or other community member

Home care nurse; home health aides/personal care workers

**Objectives**: Need is assessed by the home care nurse with family caregivers; home health aide or personal care worker stays with client for a period of time or comes into the home at periodic intervals to provide care **Indicators**: Respite assessment recorded in client's file; # of visits to or stays in client's home documented in client's file

**Objectives:** To support family or other caregivers so they can continue to provide care for the client

**Indicators**: % of caregivers who are provided respite services as documented in client files; % of respite requests granted

Objectives: To delay or prevent the need for institutional care of clients

**Indicators**: # of clients remaining in their homes with family support; caregivers are providing for client's needs for longer periods of time, with the support of short term breaks

#### 7. MEDICAL SUPPLIES AND EQUIPMENT

To provide client-specific medical supplies and equipment

Community members who have been assessed as requiring home care services

Home care nurse; home health aides

**Objectives**: Maintain a small pool of equipment and medical supplies for loan to clients with immediate, short term needs: equipment and supplies loaned are recorded Indicators: # of clients who receive medical supplies and equipment in a timely manner; % of equipment and supplies accounted for

Objectives: Provide health care in the home; link with other programs; administrative system to record supplies and equipment loaned out **Indicators**: client files show required supplies and equipment are provided; # of other programs providing support to the client; administrative system in place, staff trained, supplies and equipment are accounted for

**Objectives**: To promote the independence of client; ensure medical supplies and equipment are on-hand to provide support when needed Indicators: # of clients who remain independent with support of supplies and equipment; # of supplies and equipment on hand; # of clients remaining at home with access to short-term supplies and equipment available in the community

#### 8. Information and Data Collection

To maintain an accurate and confidential record of home and community care program activities

Funding agencies, PAGC home care consultants, health director

Home care nurse, home health aides

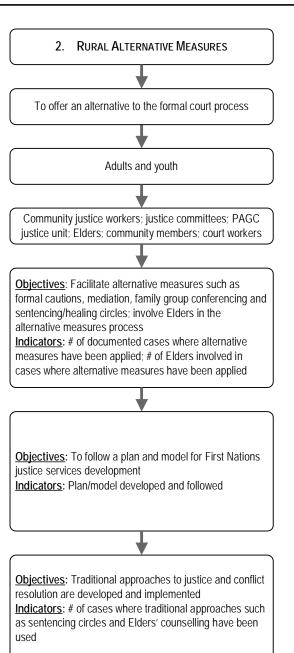

Objectives: Daily activities recorded in clients' files by home care providers; home care nurse complies, reviews data and prepares monthly statistical report; data kept in confidential and secure location; annual report prepared Indicators: % of daily activities recorded in clients' files; # of monthly statistical reports produced; % of data and reports stored in a secure location; # of annual reports produced

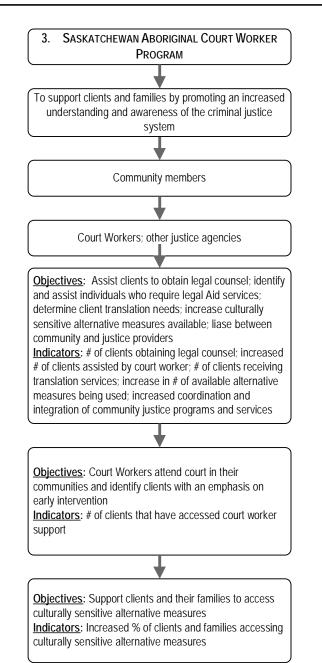

**Objectives:** Produce monthly statistical and program monitoring reports; collect data that indicates if services are meeting clients' needs **Indicators**: # of monthly statistical and program monitoring reports produced; data collected indicates if services meet needs

**Objectives**: Adapt services and programs in response to changing needs; make improvements and implement quality control Indicators: # of monitoring/planning activities; # of changes and improvements made; # and type of quality control activities; accurate information available to assess, adapt and improve services and provide accountability

To enhance and support the provision of justice services and to develop new initiatives in a culturally sensitive manner, recognizing the importance of utilizing First Nation methods to heal both individuals and communities in the PAGC region and surrounding areas while adhering to the spirit and intent of the treaties.

#### 1. JUSTICE INITIATIVES Component To coordinate development and implementation of Goal community justice structure plans and services **Target PAGC First Nations communities** Group Justice unit staff; community justice workers, committees, Resources and members; Elders; other tribal councils and agencies **Objectives:** Assist in community based initiatives; provide program and service delivery management; train and support community justice worker; support committee programs/initiatives; support interagency efforts; clarify role of PAGC and justice unit; collect and produce reports; **Activities** network with other agencies involved; monitor contracts **Indicators:** # of community based initiatives undertaken. reports produced and submitted; contacts with community justice worker, committees, tribal councils and agencies **Objectives:** Train community justice workers; develop justice committees and plans; focus on community justice development, prevention and intervention, community based alternatives; self government development and Short-term strategies Outcomes **Indicators:** # of trained justice workers; # of committees and plans in place; # of initiatives developed focused on community justice, alternatives, prevention, intervention and self government development **Objectives**: Provide culturally sensitive justice services in a manner that is meaningful to community members Long-term **Indicators:** # of culturally sensitive justice services in the **Outcomes** community; # of community members reporting these services to be meaningful

#### ... continued - page 2

#### Component

#### Goal

#### Target Group

#### Resources

#### **Activities**

#### Short-term Outcomes

#### Long-term Outcomes

#### 4. CRIME PREVENTION

To assist communities in organizing crime prevention initiatives

#### Community members

Community Justice workers; community justice committees; PAGC crime prevention coordinator; education staff; community members

<u>Objectives</u>: Establish community prevention, education, awareness, training and resources; initiate crime prevention programs and initiatives for children, youth, and adults; assist development of in school prevention activities; host justice symposium and conference; assist in development of proposals

<u>Indicators</u>: # of resources, programs, initiatives and proposals developed; # that receive funding; symposium and conference held

<u>Objectives</u>: Community members are mobilized in fighting crime in their communities

<u>Indicators</u>: # of community members involved in crime prevention initiatives

<u>Objectives</u>: Develop community-based responses to crime that emphasize a positive social development role <u>Indicators</u>: # of community-based crime responses that contribute to social development in the community; reduction in # of crimes committed

#### 5. Integrated Justice Initiative

Develop a model of a magistrate's court which focuses on community based, community driven methods that will provide community capacity-building and holding wrongdoers accountable for their actions and behavior while maintaining the victim's integrity

Community members involved in the justice system

Community justice committees; Aboriginal magistrate; crown prosecutor; police; community justice worker; court worker; community members, Elders

Objectives: Develop outline of a model of a magistrate's Court that would operate in Cree or Dene in each community, refer cases to a justice committee and withdraw charges or resume regular court process upon outcome of offender plan Indicators: Outline of the model is developed

<u>Objectives</u>: Develop a power-point presentation which overviews the need for the initiative and provides a framework for the model

**Indicators**: Power-point presentation is developed

<u>Objectives</u>: Model supported by present programs and services; remove court delays and language barriers to improve efficiency; improve community ownership of justice issues; prevent crime; promote culturally relevant justice system; promote victim's sense of justice

<u>Indicators</u>: Reduction in # of delays in the court process; increased # of cases processed using community based, community driven methods; reduction in # of crimes; court proceedings; increased sense of justice

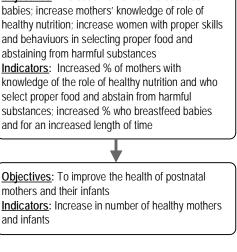

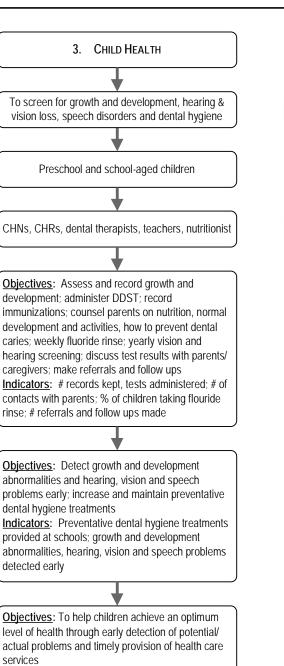

#### 1. PREGNANCY/PRENATAL Component To provide educational sessions and screening for Goal prenatals **Target** Pregnant women Group CHNs, CHRs, CPNP coordinator, NNADAP worker, Resources nutritionist. Flders Objectives: Hold prenatal, FAS/FAE classes: ensure regular doctor's visits; keep records updated; promote maternal child health, breastfeeding, healthy parenting; provide individual counselling **Activities** Indicators: # classes held and # attending: % of doctor's visits kept; # up to date records; # counselling sessions; % breastfeeding and healthy parenting Objectives: Decrease substance abuse in pregnancy; improve nutritional intake of prenatals; increase prenatals attending classes; increase # of healthy newborns Short-term **Indicators**: Decreased incidence of substance **Outcomes** abuse during pregnancy; decrease # FAS/FAE affected infants; improved nutrition of prenatals; increased # attending classes & gaining knowledge; increased # of healthy newborns Objectives: To improve infant and maternal health by promoting services to women during their Long-term pregnancy **Outcomes**

Indicators: Improved health of pregnant women

and newborns

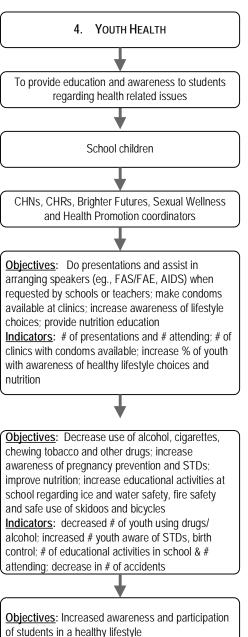

## 2. INFANT CARE To provide educational sessions and screening for postnatal mothers and their infants Postnatal mothers and their infants CHNs, CHRs, CPNP coordinator, NNADAP worker, nutritionist. Flders **Objectives**: Provide educational opportunities to postnatal mothers; identify problems early; improve nutritional intake of breastfeeding mothers; provide individual counselling: use CPNP to promote maternal child health **Indicators**: CPNP funding utilized to provide education and resources in relation to maternal child health; counselling provided; mothers' nutritional intake improved by food vouchers; postnatal visits held soon after hospital discharge Objectives: Increase women who breastfeed babies; increase mothers' knowledge of role of healthy nutrition; increase women with proper skills and behavioors in selecting proper food and abstaining from harmful substances **Indicators**: Increased % of mothers with knowledge of the role of healthy nutrition and who select proper food and abstain from harmful substances: increased % who breastfeed babies and for an increased length of time

**Indicators**: Increased health and wellness in

children

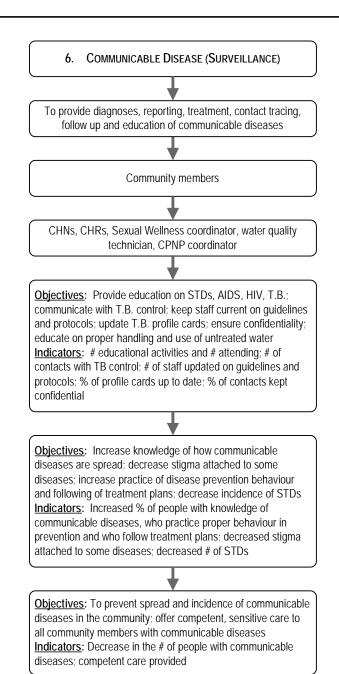

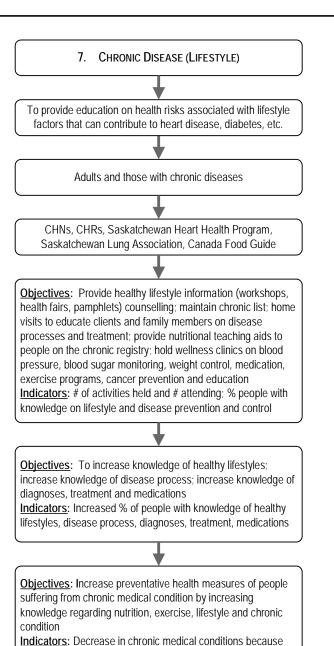

**Indicators**: Increase in % of students practicing

healthy lifestyles

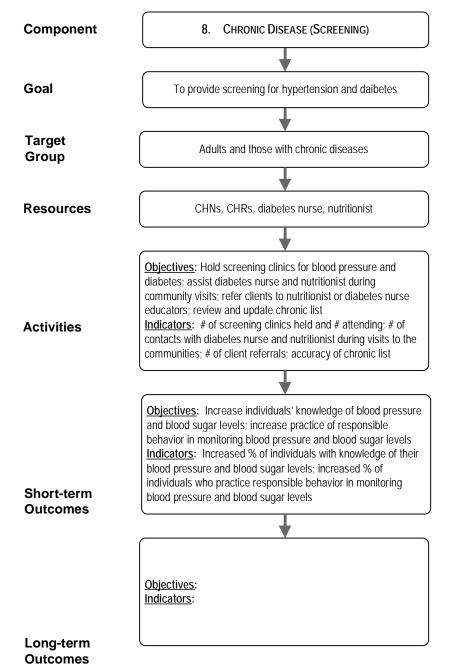

#### 5. COMMUNICABLE DISEASE (IMMUNIZATION) Component To provide immunization in accordance with the schedule Goal established by the province of Saskatchewan **Target** Infants, pre-school and school aged children and other community members Group CHNs, CHRs Resources **Objectives:** Ensure immunizations are up to date; follow community health manual schedule for infant, preschool and school children; encourage parents to bring children for **Activities** immunization Indicators: # of up to date immunization records; % of children immunized according to manual; % of parents bringing children for immunizations Objectives: To increase % of people with knowledge of the role of immunization in disease prevention; increase % of Short-term people who have immunizations done at appropriate times **Indicators**: Increased % of people with knowledge of the role **Outcomes** of immunization in disease prevention; increased % of people who have immunizations done at appropriate times **Objectives:** To reduce communicable disease in the Long-term community **Outcomes Indicators**: Decrease in the rate of communicable diseases

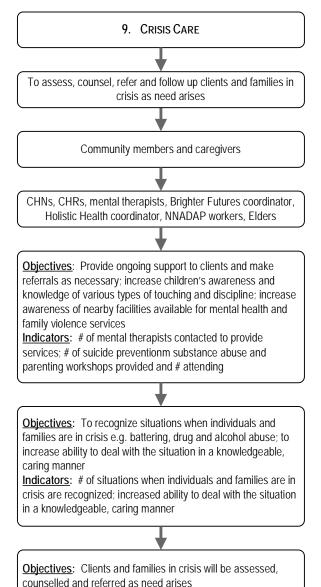

more people are practicing healthy lifestyles

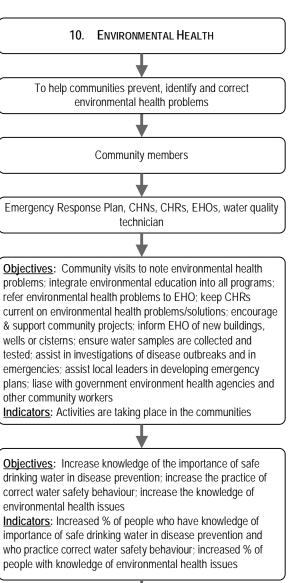

Indicators: # of clients and families in crisis are receiving

appropriate and quality mental health services when it is

needed

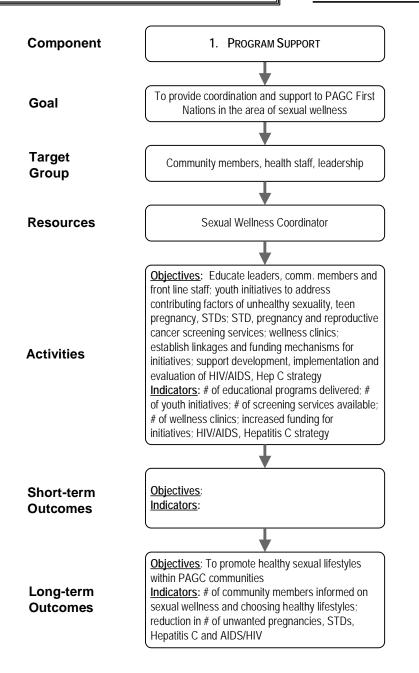

**Objectives:** Increase knowledge of the importance of safe drinking water in disease prevention; increase the practice of correct water safety behaviour; increase the knowledge of environmental health issues

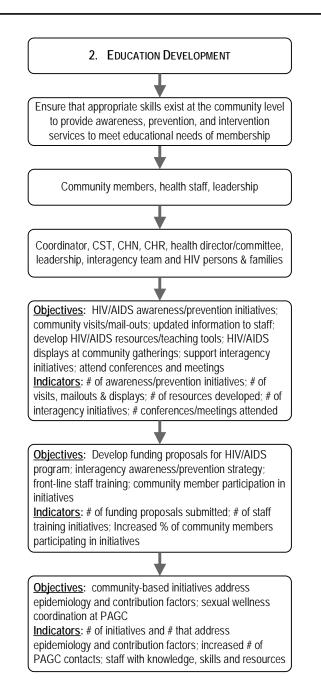

**Indicators**: Increased % of people who have knowledge of

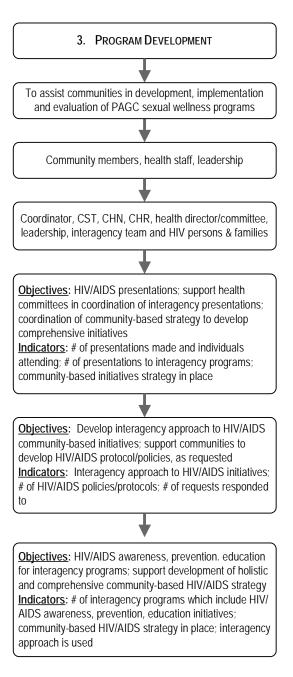

**Objectives**: To help improve the health of First Nations by promoting environmental conditions

**Indicators**: Decrease in # of diseases and health problems related to environmental conditions

To enhance the development of a holistic and multidisciplinary approach to address the promotion of healthy sexuality within PAGC First Nations.

# **Sports, Culture and Recreation**

Goal

To promote sports, culture and recreation activities that will benefit all members of the Prince Albert Grand Council

Target Group

PAGC youth and other community members

Resources

Recreation coordinators; band councillors; Elders, community members; women's commission

**Activities** 

<u>Objectives</u>: Participate in First Nation Summer and Winter Games and North American Indigenous Games; organize coaching clinics in communities (track, hockey, softball, women's hockey); annual Deneseline gathering; round dances, hand games: PAGC coordinators visit communities to develop recreation programs; hold meetings with recreation coordinators; provide recreation and leisure programs in the community

<u>Indicators</u>: # of games participated in and athletes involved, # of coaching clinics held in communities; # of community members participating; # of cultural activities held; # of community members participating; # of community visits made; # of recreation program s developed; # of meetings held with recreation coordinators; # of community based recreation and leisure programs

Short-term Outcomes

Objectives: Raise awareness of sports, culture and recreation within PAGC First Nations; work in partnership with provincial recreation authorities and FSIN sports commission; participate in regional, provincial and national sport competitions; develop athletes and coaches at the community level; develop a strategic plan to raise fiscal and human resources for sports, culture and recreation programs; incorporate Elders in cultural programming Indicators: # of community members who are aware of program activities available to them; # of contacts with provincial recreation authorities and FSIN sports commission; # of PAGC member participation; # of community members participating; % of athletes and coaches developed via activities held in their home communities; amount of fiscal and human resources raised as a result of initiatives contained in a strategic plan; # of Elders involved in cultural programming

Long-term Outcomes <u>Objectives</u>: Address and promote youth involvement in sport, culture and recreation; develop and maintain quality recreation facilities within PAGC First Nations; provide opportunities for the promotion of an active, healthy lifestyle; promote and showcase First Nation cultural heritage

Indicators: % of youth participating in sport, culture and/or recreation activities; increased # of facilities in PAGC communities; increase in quality of facilities; increased # of recreation and sport opportunities available to community members; increased # of events that showcase First Nation cultural heritage; % of community members participating; youth and community members are aware of sports, culture and recreation opportunities and enjoy an improved lifestyle through participation

## Phase I INTERVIEW QUESTIONS Health Directors April 2003

#### **PART A**

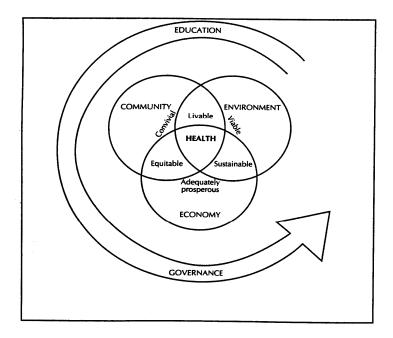

- 1. Please tell me about your particular role in planning and delivering health services in your community.
- 2. What would you say are the key issues that may be affecting the health of your community?
- 3. People often talk about the wellness of their communities. In what ways do you think community wellness is the same as your view of community health? Is it different from your view of community health?
- 4. What do you think of when you hear people talk about having capacity in your community? (Refer to table: These are some of the ways that people define the different elements of community capacity. I would like to go through each of these with you and ask which ones fit for your community. What is missing from this information?)
- 5. We have talked a little about your views of community health and wellness and we have also heard your views on community capacity. We are interested in knowing how you think capacity in your community is related to the health of your community.
  - This is challenging for all of us to think about so, as a starting point, I would like to share how some others see the linkages between community health, wellness, and capacity. Then I'll ask you to talk about which aspects of these would fit for your community and to identify what is missing that is important in your community.
- 6. Do you have any other comments that you would like to make?

## Phase I INTERVIEW QUESTIONS Health Directors April 2003

### **PART B**

We would like to review, with you, the program logic models that we developed based on written program information. We will ask you to reflect on the following questions for each of the programs:

- 1. From your perspective, do each of the program models correctly describe the programs that are currently being delivered in your community?
- 2. From your perspective how do each of these programs contribute to:
  - a. The health of your community?
  - b. The capacity of your community?

Concepts of Community Health and Community Wellness

# Phase II INTERVIEW QUESTIONS Focus Groups

- 1. Community Health and Community Wellness
  - a. What does 'community health' mean to you?
  - b. What does 'community wellness' mean to you?
  - c. When you look at the draft framework what is your understanding of:
    - i. Economic viability?
    - ii. Services and infrastructure?
    - iii. Food security?
    - iv. Healthy lifestyle?
    - v. Identity and culture?
    - vi. Health issues?
    - vii. Addictions?
  - d. Are there any areas that are missing that should be included as part of how we would measure community health? Community wellness?
- 2. Community Capacity
  - e. What does 'community capacity' mean to you?
  - f. When you look at the draft framework what is your understanding of:
    - i. Understanding community history?
    - ii. Community values?
    - iii. Sense of community?
    - iv. Education and training?
    - v. Youth involvement?
    - vi. Leadership?
    - vii. Needs Assessment?
    - viii. Organization?
    - ix. Resource mobilization?
  - g. Are there any areas that are missing that should be included as part of how we would measure community capacity?

## Appendix K

## An Example from the Toolkit

**Community Health Indicators Framework** 

**Domain: Services & Infrastructure** 

**Indicator Category: Service Delivery** 

**Identified Issue: Elders** 

**Indicator: #27 - Medical Translation & Companion Services** 

## **Services & Infrastructure**

Defined as the availability and access to services and related infrastructure; respectfully delivered health and human services; adequate and affordable housing, recreation facilities and programming; and specialized services designed to meet the needs of Elders and youth.

## Indicators:

Community Infrastructure	Service Delivery	Compassionate	28 - meals on wheels program
Sewer & Water	Local	19 – wait time for appointment transport.	29 – social gathering place for Elders
1 – houses with/without water & sewer	9 – services available in community	20 – compassionate policy exceptions	30 – programs & activities for Elders
2 – water borne illnesses	10 – health professionals in community	21 – cultural awareness programs	31 – local palliative care for Elders
3 – houses relying on bottled water	11 – visits by health professionals	Confidential	Infrastructure
Locally Staffed	12 – local service usage	22 – service confidentiality guidelines	32 - size/capacity of facility
4 – treatment facilities without staff	13 – community training in ERT	23 – staff trained on confidentiality	33 – suitability of facility
5 – facility staff from community	14 – distance from services	Youth	34 – facility usage
6 – community staff training levels	Consistent	24 – specific services for youth	35 – proper equipment for facility
Indicator #2	15 – frequency of health service delivery	25 – new funds for youth programs	
Roads	16 – scheduled services delayed	26 – youth addiction treatment facilities	<u>Housing</u>
7 – accidents on roads	17 – time to complete treatment plans	Elders	Availability
8 – repairs due to road conditions	18 – treatment completed/compromised	27 – medical translator/companion	36 – residents per house
			continued on next page

37 – generations per house	53 – programs with proper equipment	72 – utilization of existing resources	Jurisdiction Fragmentation
38 – Tuberculosis rates	Programming		86 – # agencies involved in funding
39 – housing waiting lists	54 – activities available	<u>Technology</u>	87 – resources allocated to administration
Quality	55 – summer activities available	Current	Participation
40 – houses in need of repair	56 – programs cancelled	73 – water/sewer technology used	88 – service staff from community
41 – quality of housing insulation	57 – participation & retention levels	High Speed Internet	89 – staff turnover rates
42 – presence of black mold	58 – age range of participants	74 – internet use in the community	90 – mechanisms for participation
43 – frequency of sewer back-ups	Staffing	75 – internet technology at health facility	91 – health education and awareness
44 – accidents in the home	59 – funding for trained staff	76 – distance education enrolment	Collaboration
45 – EHO inspector visits	60 – programs run by staff vs volunteers	77 – internet reliability	92 – community inter-agency meetings
Elders	61 – range of programs offered	Data Management	93 – regional inter-agency meetings
46 – housing units designed for Elders	62 – participation and retention levels	no indicators proposed	94 – service delivery collaborations
47 – house maintenance for Elders	63 – support for recreation staff		Communication
Affordable	Youth	Service Sustainability	95 – community newsletter
48 – low cost housing units	64 – youth centre in community	Sufficient Funding	96 – community meetings
49 – % of income required for housing	65 – youth involved in programs	78 – levels of program/service funding	Realistic
Jurisdiction Fragmentation	66 – school drop out rates	79 – program needs met by funding	indicator #12
50 – agencies responsible for housing	67 – school absentee rates	80 – vacant positions	97 – proximity of duplicate services
51 – time to complete house repairs	68 – youth alcohol and drug use	Stable Funding	98 – medical transport driver/patient ratio
Ownership	Promotion	81 – long term vs short term funding	99 – funder cutbacks re: abuse perception
no indicators proposed	Indicators #54, 57, 58	82 – duration of programs	Staffing
	69 – direct contacts to provide information	83 – programs cancelled	indicator #21
Recreation	Affordable	84 – staff turnover rates	
Facilities	70 – cost of recreation to users	indicator #80	
52 – type/condition of recreation facilities	71 – volunteers assisting with programs	85 – funding commitments honoured	

# **Services & Infrastructure**

Services & Infrastructure >> Service Delivery >> Elders

**Issues Identified:** Services for Elders are seen as very important to ensuring they are involved in the community, are involved with youth, and have the necessary supports to allow them to remain in the community as they grow old.

Indicator #	Community Proposed Indicator	Community Level Data Sources (suggestions)
27	Medical translation & companion services available and funded	Local survey required
28	Meals on wheels program in community	Local survey required
29	Social gathering place for Elders (e.g. coffee house)	Local survey required

## Services & Infrastructure

Services & Infrastructure >> <u>Service Delivery</u> >> **Medical Translation &**Companion Services

Issues Identified: Medical translation and companion services are important for the quality of

care, safety and comfort of community members traveling outside the community for medical services. With the assistance of a translator, Elders can communicate their needs and understand the care they receive. Safety issues for both Elders and youth can be addressed by traveling with a companion,

which can also reduce the stress of such trips.

Proposed Indicator: #27 – Medical translation and companion services available and funded

Suggested Measure: Compare the number of medical trips where translation and/or companion

services are provided to the number of medical trips where these services were

requested, or were deemed to be needed, but were not provided.

Information Source: Local survey

#### How to use this measure:

- Step 1) Identify the # (number) of medical trips where translator or companion was requested or deemed to be needed, within a given timeframe. This could also be broken down by group (i.e. Elders, youth).
- **Step 2)** Identify the # of trips where a translator or companion was provided and funded, within the timeframe (and for the specific group).
- Step 3) Use the 'Indicator Calculation Tool' formula to calculate the measure.

Indicator Calculation Tool	Calculation Example	
( ) trips - translator/companion provided	15 trips - translator/companion provided	
( ) trips - translator/companion requested or needed but not provided	25 trips - translator/companion requested or needed but not provided	
	<u>15</u>	
X 100 = % translation/companion needs met	.06 <b>X</b> 100 = 60% translation/companion needs met	
X = multiplied by ( ) = Insert number here = divided by		

#### What does this information mean?

Only ten percent (60%) of the needed or requested translation or companion services are being provided. This information could be used to demonstrate the need for more funded services, or to identify the level of service provided to particular groups, such as Elders.
